To: Joint Steering Committee for Development of RDA
From: Ebe Kartus, ACOC Representative
Subject: Clarifying Instructions for Sequences of Plates (RDA 3.4.5.9)

ACOC thanks ALA for its work to clarify the instructions for sequences of plates and supports the proposed revisions.

ACOC suggests that the word ‘always’ in the Alternative under 3.4.5.9.2 is superfluous and should be removed.

ACOC also suggests it would be useful to provide a hyperlink from the word ‘plate’ to the Glossary definition.

The revised glossary definition refers to ‘A leaf printed on one or both sides ...’. Since elsewhere a leaf is defined as printed only on one side, it might be better to use the term ‘sheet’ here: ‘A sheet printed on one or both sides...’.
