To: Joint Steering Committee for Development of RDA  
From: Alan Danskin, British Library Representative  
Subject: Revision of 0.6 Core Elements

Abstract  
This is a proposal to restructure section 0.6 of RDA, to generalise the scope to cover all elements and to reduce duplication of information in RDA.

Background  
Arising from the discussion of JSC/DNB/3, at JSC’s meeting in Washington, D.C. in November 2013, the British Library was given an action to draft a revision to section 0.6 of RDA. DNB reviewed the draft before it was shared with JSC and some changes were made subsequently.

Justification  
The discussion of JSC/DNB/3 identified the need for additional guidance in section 0.6.1 to clarify core requirements. Changes to 0.6.1 and the related instructions at 2.3.4.3 and 2.5.2.3 (6JSC/Sec/11) were agreed at the November 2013 JSC meeting in Washington (M415), and these were published in the April 2014 RDA Update. However, it was acknowledged that a comprehensive review of section 0.6 is required and would lay the groundwork for application profiles.

Issues to be resolved  
• Section 0.6 is captioned “Core Elements”, however the scope is not restricted to core elements. There is a paragraph for each section of RDA many of which do not contain any core elements.
• Is it necessary to list the core elements in the introduction? The core elements are listed at the beginning of each chapter and clearly identified in the text.
• If the core elements are not listed in 0.6 where should they be listed?  
  o Could a core view of element set be generated in OMR?  
  o Element Analysis Table  
  o Toolkit Element Set  
  o New RDA Appendix  
• The publication of an RDA element set as unconstrained elements may require explanation or at least reference in the Introduction.

Impact assessment  
• Removing explicit list of core elements from the RDA Introduction will reduce editorial overhead, particularly if the list can be generated from the OMR.
• Replacing the list of core elements with a link works in the toolkit, but may need a different solution in the print, e.g. an Appendix.
Recommendations for changes

1. Change the caption at 0.6 from Core Elements to RDA Elements
2. Add new section to make general statements about element
3. Renumber Core Elements
4. Generalise the guidance to replace explicit listing of core elements with external link to authoritative list of elements
5. Explicitly mention cardinality

MARKED UP COPY

0.6 Core Elements RDA Elements

0.6.1 General
The elements in RDA for describing a resource generally reflect the attributes and relationships associated with the FRBR entities work, expression, manifestation, and item.

The elements in RDA for describing entities associated with a resource generally reflect the attributes and relationships associated with the FRAD entities person, family, corporate body, and place.

0.6.2 General Core Elements
Certain elements in RDA are identified as core elements. The RDA core elements for describing resources were selected according to the FRBR assessment of the value of each attribute and relationship in supporting the following user tasks:

- identify and select a manifestation
- identify works and expressions embodied in a manifestation
- identify the creator or creators of a work.

The RDA core elements for describing entities associated with resources were selected according to the FRAD assessment of the value of each attribute and relationship in supporting the following user tasks:

- find a person, family, or corporate body associated with a resource
- identify a person, family, or corporate body.

The elements identified in RDA as core elements are listed at 0.6.2RDA–0.6.9RDA <link to authoritative source>.

0.6.3 Cardinality
Elements may occur as often as is required. No more than one instance of a core element is required. Other instances are optional.

0.6.4 Conformance
As a minimum, a resource description for a work, expression, manifestation, or item should include all the core elements that are applicable and readily ascertainable. The

---

1 See FRBR, chapter 6.

2 See FRAD, chapter 6.
description should also include any additional elements that are required in a particular case to differentiate the resource from one or more other resources with similar identifying information.

A description of an entity associated with a resource should include all the core elements that are applicable and readily ascertainable. The description should also include any additional elements that are required in a particular case to differentiate the entity from one or more other entities with the same name or title.

The inclusion of other specific elements or subsequent instances of these elements is optional. The agency responsible for creating the data may choose:

a) to establish policies and guidelines on levels of description and authority control to be applied either generally or to specific categories of resources and other entities

or

b) to leave decisions on the level of detail to the judgment of the cataloguer or the individual creating the data.

0.6.2 Section 1: Recording Attributes of Manifestation and Item

When recording data identifying and describing a manifestation or item, include as a minimum all the following elements that are applicable and readily ascertainable:

Title
Title Proper

Statement of Responsibility
Statement of responsibility relating to title proper (if more than one, only the first recorded is required)

Edition statement
Designation of edition
Designation of a named revision of an edition

Numbering of serials
Numeric and/or alphabetic designation of first issue or part of sequence (for first or only sequence)
Chronological designation of first issue or part of sequence (for first or only sequence)
Numeric and/or alphabetic designation of last issue or part of sequence (for last or only sequence)
Chronological designation of last issue or part of sequence (for last or only sequence)

Production statement
Date of production (for a resource in an unpublished form)

Publication statement
Place of publication (if more than one, only the first recorded is required)
Publisher’s name (if more than one, only the first recorded is required)
Date of publication

Distribution statement
0.6.3 Section 2: Recording Attributes of Work and Expression

When recording data identifying a work, include as a minimum the following elements that are applicable and readily ascertainable.

- Preferred title for the work
- Identifier for the work

The preferred title is the basis for the authorized access point representing the work. When constructing that access point, precede the preferred title, if appropriate, by the authorized access point representing the person, family, or corporate body responsible for the work (see 6.27.1 RDA).

If the preferred title for a work is the same as or similar to a title for a different work, or to a name for a person, family, or corporate body, differentiate them by recording as many of the additional identifying elements in the following list as necessary. Record these elements as separate elements, as parts of the access point representing the work, or as both:

- Form of work
- Date of work
Place of origin of the work
Other distinguishing characteristic of the work

When identifying a musical work with a title that is not distinctive, record as many of the following elements as are applicable. For musical works with distinctive titles, record as many of the following elements as necessary to differentiate the work from others with the same title. Record the elements as separate elements, as parts of the access point representing the work, or as both.

Medium of performance
Numeric designation of a musical work
Key

When recording data identifying an expression, include as a minimum the following elements that are applicable to that expression. Record the elements as separate elements, as parts of the access point representing the expression, or as both.

Identifier for the expression
Content type
Language of expression

Record as many of the additional identifying elements in the following list as necessary to differentiate one expression of a work from another. Record the elements as separate elements, as parts of the access point representing the expression, or as both.

Date of expression
Other distinguishing characteristic of the expression

When describing a cartographic expression, include as a minimum the following additional elements that are applicable to that expression.
Horizontal scale of cartographic content
Vertical scale of cartographic content

0.6.4 Section 3: Recording Attributes of Person, Family, and Corporate Body

When recording data identifying a person, family, or corporate body, include as a minimum the following elements that are applicable and readily ascertainable. Record the elements as separate elements, as parts of the authorized access point representing the person, family, or corporate body, or as both.

Preferred name for the person
Title of the person (a word or phrase indicative of royalty, nobility, ecclesiastical rank or office; a term of address for a person of religious vocation)
Date of birth
Date of death
Other designation associated with the person (for a Christian saint, a spirit, a person named in a sacred scripture or an apocryphal book, a fictitious or legendary person, or a real non-human entity)

Profession or occupation (for a person whose name consists of a phrase or appellation not conveying the idea of a person)

Identifier for the person

Preferred name for the family

Type of family

Date associated with the family

Identifier for the family

Preferred name for the corporate body

Location of conference, etc.

Date of conference, etc.

Associated institution (for conferences, etc., if the institution’s name provides better identification than the local place name or if the local place name is unknown or cannot be readily determined)

Number of a conference, etc.

Type of corporate body (for a body whose name does not convey the idea of a corporate body)

Identifier for the corporate body

If the preferred name for the person, family, or corporate body is the same as or similar to a name by which another person, family, or corporate body is known, differentiate them by recording as many of the additional identifying elements in the following list as necessary. Record these elements as separate elements, as parts of the authorized access point representing the person, family, or corporate body, or as both:

Title of the person (another term indicative of rank, honour, or office)

Fuller form of name

Profession or occupation

Period of activity of the person

Other designation associated with the person

Place associated with the family

Prominent member of the family

Location of headquarters

Date of establishment

Date of termination

Period of activity of the corporate body

Associated institution

Other designation associated with the corporate body

0.6.5 Section 5: Recording Primary Relationships between Work, Expression, Manifestation, and Item
When recording primary relationships between a work, expression, manifestation, and item, include as a minimum the work manifested. If there is more than one expression of the work, record the expression manifested. If more than one work is embodied in the manifestation, only the predominant or first-named work manifested is required. If more than one expression is embodied in the manifestation, only the predominant or first-named expression manifested is required.

0.6.6 Section 6: Recording Relationships to Persons, Families, and Corporate Bodies Associated with a Resource
When recording relationships between a resource and persons, families, and corporate bodies associated with that resource, include as a minimum the following elements that are applicable and readily ascertainable:

- Creator (if more than one, only the creator having principal responsibility named first in resources embodying the work or in reference sources is required; if principal responsibility is not indicated, only the first-named creator is required)
- Other person, family, or corporate body associated with a work (if the authorized access point representing that person, family, or corporate body is used to construct the authorized access point representing the work)

0.6.7 Section 7: Recording Subject Relationships
When recording relationships between a work and an entity that is the subject of that work, include as a minimum at least one subject relationship element.23

0.6.8 Section 8: Recording Relationships between Works, Expressions, Manifestations, and Items
The recording of relationships between related works, expressions, manifestations, and items is not required. For the primary relationships, see 0.6.5 RDA.

0.6.9 Section 9: Recording Relationships between Persons, Families, and Corporate Bodies
The recording of relationships between persons, families, and corporate bodies is not required.

---

23 When using an access point to represent the subject entity, the access point can be constructed by using either the preferred name, title, or term for the entity, or a classification number representing the entity. Construct the access point representing the subject entity following the standards for subject access points and classification numbers used by the agency creating the data.
0.6 RDA Elements

0.6.1 General
The elements in RDA for describing a resource generally reflect the attributes and relationships associated with the FRBR entities work, expression, manifestation, and item.

The elements in RDA for describing entities associated with a resource generally reflect the attributes and relationships associated with the FRAD entities person, family, corporate body, and place.

0.6.2 Core Elements
Certain elements in RDA are identified as core elements. The RDA core elements for describing resources were selected according to the FRBR assessment of the value of each attribute and relationship in supporting the following user tasks:

identify and select a manifestation
identify works and expressions embodied in a manifestation
identify the creator or creators of a work.

The RDA core elements for describing entities associated with resources were selected according to the FRAD assessment of the value of each attribute and relationship in supporting the following user tasks:

find a person, family, or corporate body associated with a resource
identify a person, family, or corporate body.

The elements identified in RDA as core elements are listed at <link to authoritative source>.

0.6.3. Cardinality
Elements may occur as often as is required. No more than one instance of a core element is required. Other instances are optional.

0.6.4. Conformance
As a minimum, a resource description for a work, expression, manifestation, or item should include all the core elements that are applicable and readily ascertainable. The description should also include any additional elements that are required in a particular case to differentiate the resource from one or more other resources with similar identifying information.

A description of an entity associated with a resource should include all the core elements that are applicable and readily ascertainable. The description should also

---

5 See FRAD, chapter 6.
include any additional elements that are required in a particular case to differentiate the entity from one or more other entities with the same name or title.

The inclusion of other specific elements or subsequent instances of these elements is optional. The agency responsible for creating the data may choose:

a) to establish policies and guidelines on levels of description and authority control to be applied either generally or to specific categories of resources and other entities

or

b) to leave decisions on the level of detail to the judgment of the cataloguer or the individual creating the data.
