Subject: Other place associated with the person: Revision RDA 9.11

ACOC thanks BL for this proposal to expand the scope of RDA 9.11 to include places other than countries with which a person is identified, but where they have not resided.

We support the intention but seek further detail in the proposal as it currently stands.

It is our view that residence should be reinstated in 9.11.1.1 as it is an important association and should not be completely omitted. The intention of the proposal as we understand it is to shift residence from being the dominant type of place to being one of several useful types of place, but not to remove it all together.

An additional change to the proposed change of wording to 9.11.1.1 Scope could include ‘a place where a person has resided,’ in green below.

Proposed change

9.11.1 Scope
Other place associated with the person is a significant location associated with a person (e.g., a place where a person has worked or studied, a place that a person has designed or built, a place that a person has studied or written about, a place that a person has explored).

Additional change to that proposed

9.11.1.1 Scope
Other place associated with the person is a significant location associated with a person (e.g., a place where a person has resided, a place where a person has worked or studied, a place that a person has designed or built, a place that a person has studied or written about, a place that a person has explored).

We look forward to further discussion of this and suggesting to the FRBR Review Group that similar change be made to FRAD 4.1.
