Subject: Adjustment to exception for recording acronym(initialism) titles in favour of base instruction (2.3.2.5, exception)

ACOC thanks LC for this proposal to adjust the exception for recording acronym(initialism) titles in favour of base instruction (RDA 2.3.2.5 Exception).

We support the proposed change, but would prefer to see the Exception changed to say ‘both’ rather than ‘either’ and ‘or’. – It is other title information if it occurs on the source; and if either the full form or initialism could be considered the title proper then a variant title is needed too.
