This revision incorporates the decisions at the 2011 JSC meeting and does not require a JSC response. The changes from the original proposal are shown in yellow highlighting in the marked-up version below (note: this does not include the yellow background that shows up for examples).

During the US RDA Test, LC received several questions about the display of see also references when a relationship designator was used in conjunction with the authorized access point. Since this was not a concept applicable to AACR2, it did not get addressed in Appendix E for the presentation of see also references. LC proposes to add the instruction below, as well as an example.

In addition, LC proposes to add “Families” to the caption and instruction, where appropriate.

**E.1.3.3 See also References to Authorized Access Points Representing Related Persons, Families, Corporate Bodies, and Works**

Present a see also reference from the authorized access point representing a person, family, corporate body, or work to the authorized access point representing a related person, family, corporate body, or work as illustrated below.

When using a relationship designator with an authorized access point, present the see also reference beginning with the relationship designator, followed by a colon, space, and the authorized access point for the related person, family, corporate body, or work as illustrated below.

**EXAMPLE**

Canadian Figure Skating Association

Successor: Organization of American States

Alternatives

When presenting a see also reference from the authorized access point representing a person, family, corporate body, or work to two or more authorized access points representing different related persons, families, corporate bodies, or works, present one see also reference, listing all the authorized access points for related persons, families, corporate bodies, or works to which reference is being made.

EXAMPLE
Pennsylvania. Department of Public Welfare
