314 Status report from JSC members on actions from November 2011 JSC meeting

*End of Executive Session 1*

315 Beginning of the public session

315.1 Barbara Tillett welcomed the observers. All present introduced themselves. Barbara Tillett announced her upcoming retirement and the naming of David Reser as the next LC representative to the JSC.

316 Approval of the agenda

316.1 Received and considered the following document:

6JSC/A/2/rev/2

316.2 The order of topics #19 (Places ...) and #20 (Corporate bodies ...) was reversed. The agenda was approved as revised. Under #23, other topics were added: the concerns about cataloging of serials in Germany, national libraries’ implementation decisions, use and form of relationship designators (began as an email from Mark Ehlert). [The order of some other agenda topics was changed during the week.]

317 Minutes of the previous meeting held (November 2011)

317.1 Received and considered the following documents:

6JSC/M/Restricted/284-308

317.2 The minutes were accepted as corrected based on emails from the JSC members.

317.3 Judy Kuhagen will remove the restricted portions of the minutes, posting the resulting public version on the JSC public web site. She will post the restricted versions of the November 2011 meeting and of previous meetings on the private Workspace site.  

*Action=Secretary*

318 Next meeting in 2013

318.1 Barbara Tillett said there would be more clarification about the future schedule at the November 7 CoP meeting. It is probably too soon to change the date for 2013 but perhaps to July in 2014.

318.2 Christine Frodl said that the German constituency preferred an October or November JSC meeting due to the timing of ALA, IFLA, and EURIG meetings.
Going to July also causes problems getting people together due to the Easter holidays.

318.3 John Attig said that ALA would find a July JSC meeting challenging.

318.4 Kevin Marsh said that ACOC would agree to a July meeting in 2014.

318.5 Alan Danskin said he had a preference for July because it was difficult to get people together to prepare for a November meeting.

319 Manifestations and items – transcription: 6JSC/ALA/20 (Proposed revision of RDA 2.1.2.2 and 2.1.2.3, Basis for Identification of the Resource)

319.1 Received and considered the following documents:

6JSC/ALA/20
6JSC/ALA/20/ACOC response
6JSC/ALA/20/BL response
6JSC/ALA/20/CCC response
6JSC/ALA/20/CILIP response
6JSC/ALA/20/DNB response
6JSC/ALA/20/LC response

319.2 John Attig explained that both 6JSC/ALA/20 and 6JSC/ALA/21 were high priorities for ALA. The instructions for Basis for identification and Sources of information are difficult to apply. He noted that BL and CILIP do not think that the proposed changes are needed; Alan Danskin and Gordon Dunsire said they would like to hear the discussion.

319.3 Recommendation #1 would add language to 2.1.2.2 and 2.1.2.3 to prefer a collective title as the title proper. Judy Kuhagen noted that there had been many questions from catalogers of moving image resources, etc., during the US RDA Test about the need to do separate descriptions because a collective title could not be chosen. Gordon Dunsire said he was concerned that the instruction was becoming more prescriptive and that the ALA intent could instead be given in an application profile. John Attig said that perhaps the ALA proposal didn’t state its principle clearly: different conventions for different users, based on the principle of representation. Barbara Tillett said that the Library of Congress would like the eventual solution to be a general instruction that applies to all resources. Barbara Tillett asked if BL and CILIP would agree to this change if the ALA group keeps working on the overall topic of sources; Alan Danskin said the BL could agree and Gordon Dunsire said CILIP would accept the change if it was “un-doable” in the future. This recommendation was accepted with the changes suggested by CCC to use “embodies” in the first paragraph of 2.1.2.2 and to add another category (sound recording but using the revised term “audio recording”) to the “e.g.” statement in that paragraph.
319.4 Recommendation #2 would add language to 2.1.2.2 and 2.1.2.3 to use a source of information for a predominant work to represent the resource as a whole. This recommendation was accepted.

319.5 Recommendation #3 modifies the categories in 2.1.2.3 to make the distinction between resources manifesting a single work and manifesting multiple works and to clarify the concept of sequential numbering. JSC agreed to combine a) and b), using LC’s wording and adding “preferring a source with a collective title.”

319.6 Gordon Dunsire noted that he thought the JSC was moving away from the principle of identifying resources as represented and hoped that future discussions would maintain balance.

Clean copies (this text will be merged with the reworded chapter 2 before it appears in the 2013 RDA Update of the RDA Toolkit):

2.1.2.2 Resource Issued as a Single Unit

When preparing a comprehensive description for a resource issued as a single unit (e.g., a textbook in one volume, an audio recording) that is not an integrating resource (see 2.1.2.4), choose a source of information identifying the resource as a whole (e.g., a source with a collective title). If the resource embodies multiple works (e.g., a compact disc embodying multiple works), prefer a source that bears a collective title.

If there is no source of information identifying the resource as a whole, but one source bears a title identifying a main or predominant work or content (e.g., a single videodisc containing a feature film along with trailers, outtakes, interviews, or other material related to the feature film), consider that source to identify the resource as a whole.

If there is no source of information identifying the resource as a whole and no source bears a title identifying a main or predominant work or content (e.g., a single videodisc containing multiple feature films but with no source of information identifying the resource as a whole), treat the sources of information identifying its individual contents as a collective source of information for the resource as a whole.

2.1.2.3 Resource Issued in More Than One Part

When preparing a comprehensive description for a resource issued in more than one part (e.g., a series of scientific treatises, a periodical, a compact disc set) that is not an integrating resource (see 2.1.2.4), choose one of the following, as appropriate, as the basis for identifying the resource as a whole:

a) If the resource is issued as a set that is unnumbered, or if the numbering does not help to establish an order (e.g., a compact disc set containing an opera, a kit), choose a source of information identifying the resource as a whole, preferring a source that bears
a collective title. See categories d) or e) if there is no source of information identifying the resource as a whole.

b) If the resource has sequentially numbered issues or parts, choose a source of information identifying the lowest numbered issue or part available.

c) If the resource has unnumbered issues or parts, or if it has numbering that does not help to establish an order, choose a source of information identifying the issue or part with the earliest date of issue.

d) If there is no source of information identifying the resource as a whole, but one source bears a title identifying a main or predominant work or content, consider that source to identify the resource as a whole.

e) If there is no source of information identifying the resource as a whole and no source bears a title identifying a main or predominant work or content (e.g., a videodisc set containing multiple feature films but with no source of information identifying the resource as a whole), treat the sources identifying the individual parts as a collective source of information for the resource as a whole.

[remainder of instruction unchanged]

320 Manifestations and items – transcription: 6JSC/ALA/21 (Proposed Revisions of RDA instructions on Sources of Information (RDA 2.2.2.1-2.2.2.4))

320.1 Received and considered the following documents:

6JSC/ALA/21
6JSC/ALA/21/ACOC response
6JSC/ALA/21/BL response
6JSC/ALA/21/CCC response
6JSC/ALA/21/CILIP response
6JSC/ALA/21/DNB response
6JSC/ALA/21/LC response

320.2 John Attig said that the ALA proposal has three recommendations for status of containers, covers as sources of information, and the priority of sources for moving image resources. He noted that CILIP felt the changes were unnecessary; Gordon agreed that the JSC should discuss the possible changes.

320.3 Recommendation #A would first revise language in 2.2.2.1 to make more explicit the role of a publisher-issued container as being part of a resource. The JSC agreed that the present tense “is” should be used as noted by the BL and to accept the CCC comment to change “such as” to “e.g.”
320.4 Recommendation #A would also revise wording in the a) and b) paragraphs of 2.2.4. The JSC accepted LC’s revision of the proposed wording in the a) paragraph and the recommendation to change the order of the b) and c) paragraphs.

320.5 Recommendation #B adds wording to the instruction and the exception in 2.2.2 to make a distinction between covers issued with the resource and those added after the resource is issued. The JSC accepted LC’s comment to add “jacket” as another source, LC’s other revisions in wording, and the addition of a definition for “cover” to the glossary. LC was asked to submit a glossary definition for “jacket.”

Action=LC representative

320.6 Recommendation #C adds wording to 2.2.2.3 and 2.2.2.4 to choose the first applicable source bearing a formally-presented collective title. John Attig explained that this revision would allow more flexibility. Gordon Dunire expressed his concern that the instructions are now more prescriptive; if a new digital carrier would evolve tomorrow, there could be problems with this instruction wouldn’t apply. For now, the JSC agreed to go with a priority order and accepted LC’s idea to divide the content of 2.2.2.3 and 2.2.2.4 into “tangible resources” and “online resources” and asked the Secretary to decide how to incorporate the similar revisions from CCC and LC. In 2.2.2.4, the JSC agreed to add the CCC wording about a formally-presented collective title to LC’s wording.

Clean copies (after the meeting, the JSC agreed to the change for 2.3.3.1 as shown below; this text will be merged with the reworded chapter 2 before it appears in the 2013 RDA Update of the RDA Toolkit):

2.2.2.1 General Guidelines

[1st-3rd paragraphs unchanged]

Treat a container issued with the resource (e.g., a box in which a game or kit is issued, a clamshell box containing compact discs in individual jewel cases or cardboard sleeves) as part of the resource itself. Treat a container that is not issued with the resource (e.g., a box or case made by the owner) as a source outside the resource itself.

[remainder of instruction unchanged]

2.2.2.2 Resources Consisting of One or More Pages, Leaves, Sheets, or Cards (or Images of One or More Pages, Leaves, Sheets, or Cards)

[1st paragraph and alternative unchanged]
If the resource lacks a title page, title sheet, or title card (or image thereof), use as the preferred source of information the first of the following sources that bears a title:

a) a cover or jacket issued with the resource (or an image of that cover or jacket)
b) a caption (or an image of a caption)
c) a masthead (or an image of a masthead)
d) a colophon (or an image of a colophon).

**Exception**

**Early printed resources.** If an early printed resource (or a reproduction thereof) lacks a title page, title sheet, or title card (or image thereof), use as the preferred source of information the first of the following sources that bears a title:

a) a colophon (or an image of a colophon)
b) a cover or jacket issued with the resource (or an image of that cover or jacket)
c) a caption (or an image of a caption)

[remainder of instruction unchanged]

### 2.2.2.3 Resources Consisting of Moving Images

If the resource consists of moving images (e.g., a film reel, a videodisc, a video game, an MPEG video file), use the title frame or frames, or title screen or screens, as the preferred source of information. If the title frames or title screens only list the titles of the individual contents and another source forming part of the resource bears a formally-presented collective title, use as the preferred source of information the first applicable source bearing a formally-presented collective title.

**Alternative**

Use a label bearing a title that is permanently printed on or affixed to the resource (excluding accompanying textual material or a container) in preference to the title frame or frames, or title screen or screens.

If the resource does not contain a title frame or title screen, follow the guidelines below for tangible or online resources to choose the preferred source of information.

### 2.2.2.3.1 Tangible Resources

Use as the preferred source of information the first of the following that bears a title:
a) a label that is permanently printed on or affixed to the resource, excluding accompanying textual material or a container (e.g., a label on a videodisc)
b) for a comprehensive description, a container or accompanying material issued with the resource
c) an internal source forming part of a tangible digital resource (e.g., a disc menu).

2.2.2.3.2. Online Resources

Use as the preferred source of information the first of the following that bears a title:

a) textual content
b) embedded metadata in textual form that contains a title (e.g., metadata embedded in an MPEG video file).

If the resource contains neither a title frame or title screen nor a source of information as listed above for tangible or online resources, use as the preferred source of information another source forming part of the resource itself, giving preference to sources in which the information is formally presented.

2.2.2.4. Other Resources

For a resource other than one covered under 2.2.2.2–2.2.2.3, follow the guidelines below for tangible or online resources to choose the preferred source of information. If a source of information only lists the titles of the individual contents and another source forming part of the resource bears a formally-presented collective title, use as the preferred source of information the first applicable source bearing a formally-presented collective title.

2.2.2.4.1. Tangible Resources

Use as the preferred source of information the first of the following that bears a title:

a) a textual source on the resource itself (e.g., a slide) or a label that is permanently printed on or affixed to the resource, excluding accompanying textual material or a container (e.g., a label on an audio CD or a model)
b) an internal source, such as a title screen, whose textual content formally presents the title
c) for a comprehensive description, a container or accompanying material issued with the resource

2.2.2.4.2. Online Resources

Use as the preferred source of information the first of the following that bears a title:

a) textual content
b) embedded metadata in textual form that contains a title (e.g., metadata embedded in an MP3 audio file)

If the resource does not contain a source of information as listed for tangible or online resources, use as the preferred source of information another source forming part of the resource itself, giving preference to sources in which the information is formally presented.

---

### 2.2.4 Other Sources of Information

[1st paragraph introducing the list unchanged]

a) accompanying material (e.g., a leaflet, an "about" file) that is not treated as part of the resource itself as described in 2.2.2.1

b) other published descriptions of the resource

c) a container that is not issued with the resource itself (e.g., a box or case made by the owner)

d) any other available source (e.g., a reference source).

[remainder of instruction unchanged]

---

### 2.3.1.1 Scope

[1st paragraph unchanged]

More than one title may appear in sources of information (such as on a title page, title frame; as a caption title, running title; on a cover, spine; on a title bar), on a jacket, sleeve, container, etc., or in material accompanying the resource.

[remainder of instruction unchanged]

---

### Glossary: Cover

The outer protective material attached to a volume, consisting of both sides of the front and back panels and the spine to which they are joined.

### 321 Manifestations and items – transcription: 6JSC/BL/9 (Change to 2.2.4 to remove parallel title proper)

321.1 Received and considered the following documents:

6JSC/BL/9
6JSC/BL/9/ACOC response
6JSC/BL/9/ALA response
321.2 Alan Danskin said the BL proposal would resolve the contradiction between 2.3.3.2 and 2.2.4 d) by removing “Parallel title proper” from the list in 2.2.4 of elements that can be taken from outside the resource.

321.3 Judy Kuhagen noted that there is not a similar restriction on the title proper at 2.2.3.2. The JSC agreed not to change 2.2.4 but to expand the source information at 2.3.3.2 by using the wording in the ALA response.

321.4 Gordon Dunsire asked how this impact on the ISBD mapping will be communicated to the ISBD Review Group. Barbara Tillett suggested that Christine Frodl, as the liaison to the ISBD Review Group, discuss this change with the group.

Clean copy (this text will be merged with the reworded chapter 2 before it appears in the 2013 RDA Update of the RDA Toolkit):

2.3.3.2 Sources of Information

Take parallel titles proper from any source within the resource. If the title proper is taken from outside the resource, take parallel titles proper from the same source.

322 Manifestations and items – transcription: 6JSC/LC/13 (Adjustment to exception for recording acronym/initialism titles in favor of base instruction (2.3.2.5, exception))

322.1 Received and considered the following documents:

6JSC/LC/13
6JSC/LC/13/ACOC response
6JSC/LC/13/ALA response
6JSC/LC/13/BL response
6JSC/LC/13/CCC response
6JSC/LC/13/CILIP response
6JSC/LC/13/DNB response

322.2 Barbara Tillett asked Kate James to present this LC proposal. Kate explained that the change would allow catalogers to choose if and how to record an acronym or initialism form not selected as the title proper. This flexibility would also support closer harmonization with the ISSN practice of giving the acronym or initialism form as a variant title. The JSC accepted the proposal.

Clean copy (this text will be merged with the reworded chapter 2 before it appears in the 2013 RDA Update of the RDA Toolkit):
2.3.2.5 Title in More Than One Form

[1st paragraph and example unchanged]

Exception

Serials and integrating resources. If the title of a serial or integrating resource appears on the source of information for the title proper in full as well as in the form of an acronym or initialism, choose the full form as the title proper.

323 Manifestations and items – transcription: 6JSC/ALA/10 (Revision of RDA 2.5.1.4, Recording Edition Statements)

323.1 Received and considered these documents:

6JSC/ALA/10
6JSC/ALA/10/ACOC response
6JSC/ALA/10/BL response
6JSC/ALA/10/CCC response
6JSC/ALA/10/CILIP response
6JSC/ALA/10/DNB response
6JSC/ALA/10/LC response

323.2 John Attig noted that there have been long-standing problems identifying what are edition statements and the differences between expressions vs. different manifestations of the same expression.

323.3 John Attig noted the disagreement in the ACOC response and the CCC response’s recommendation not to revise 2.5.1.4 but to move the examples to 6.12. John said he’d prefer to withdraw the proposal rather than just move the examples.

323.4 Kate James noted the example of a large-print edition being a new manifestation rather than a new expression and the fact that many large-print editions do not have an edition statement.

323.5 Gordon Dunsire said to ignore the CILIP response’s concerns and suggestion for wording. The JSC accepted the proposal with the CCC suggestion to change “selection” to “access” and the two suggestions from LC.

Clean copy (this text will be merged with the reworded chapter 2 before it appears in the 2013 RDA Update of the RDA Toolkit):

2.5.1.4 Recording Edition Statements
Optional Addition

If a resource lacks an edition statement but is known to contain significant changes from other editions, supply an edition statement, if it is considered to be important for identification or access. Indicate that the information was taken from a source outside the resource itself as instructed under 2.2.4.

EXAMPLE

[Hand-coloured and corrected edition]

F major edition

Note on edition statement reads: Edition statement from publisher’s catalog

324 Manifestations and items – transcription: Fast Track entry for 2.8.1.1 ("Consider all remote access resources to be published")

324.1 Barbara Tillett explained that this Fast Track entry had been held for discussion by the JSC. The JSC agreed to the addition of this sentence to 2.8.1.1 with the change from “remote access” to “online.”

325 Manifestations and items – transcription: 6JSC/ALA/11 (Recording Copyright Dates)

325.1 Received and considered these documents:

6JSC/ALA/11
6JSC/ALA/11/ACOC response
6JSC/ALA/11/BL response
6JSC/ALA/11/CCC response
6JSC/ALA/11/CILIP response
6JSC/ALA/11/DNB response
6JSC/ALA/11/LC response

325.2 John Attig said that after considering the responses of the JSC constituencies, ALA now proposes making the change be part of the general instruction rather than as an exception as proposed in 6JSC/ALA/11 with one paragraph for multiple dates for various aspects and another for multiple dates for a single aspect. The JSC accepted that change in the proposal and accepted LC’s wording for the paragraph on various aspects and CCC’s wording for the paragraph on a single aspect.

325.3 The JSC agreed to the CILIP suggestion to use the term “phonogram copyright” rather than just “phonogram.”
Clean copy (minor changes were made via JSC email after the meeting; this text will be merged with the reworded chapter 2 before it appears in the 2013 RDA Update of the RDA Toolkit):

2.11.1.3 Recording Copyright Dates

Record copyright dates applying the general guidelines on numbers expressed as numerals or as words given under 1.8. Precede the date by the copyright symbol (©) or the phonogram copyright symbol (℗), or by copyright or phonogram copyright if the appropriate symbol cannot be reproduced.

EXAMPLE

©2002

copyright 2005

℗1983

phonogram copyright 1993

If the resource has multiple copyright dates that apply to various aspects (e.g., text, sound, graphics), record any that are considered important for identification or selection.

EXAMPLE

℗2009

©2010

Source of information reads: ©2010, disc ℗2009

If the resource has multiple copyright dates that apply to a single aspect (e.g., text, sound, or graphics), record only the latest copyright date.

[optional addition unchanged]

326 Manifestations and items – transcription: 6JSC/ALA/7 (Revision of RDA 2.12.8 and 2.12.16, regarding recording ISSNs)

326.1 Received and considered these documents:

6JSC/ALA/7
6JSC/ALA/7/ACOC response
6JSC/ALA/7/BL response
6JSC/ALA/7/CCC response
6JSC/ALA/7/CILIP response
6JSC/ALA/7/DNB response
6JSC/ALA/7/LC response
326.2 John Attig noted that the change recommended by BL to give a priority order would make the sources consistent between 2.12.2.2 and 2.12.8.2/2.12.16.2.

326.3 The JSC accepted the proposal with the BL suggestions to give a priority order and to change “record” to “transcribe.”

Clean copies (minor changes were made via JSC email after the meeting; this text will be merged with the reworded chapter 2 before it appears in the 2013 RDA Update of the RDA Toolkit):

**2.12.8.2 Sources of Information**

327 Manifestations and items – carriers: 6JSC/ALA/17 (Machine-Actionable Data Elements in RDA Chapter 3: Discussion Paper)

327.1 Received and considered these documents:

6JSC/ALA/17
6JSC/ALA/17/ACOC response
6JSC/ALA/17/BL response
6JSC/ALA/17/CCC response
6JSC/ALA/17/CILIP response
6JSC/ALA/17/DNB response
6JSC/ALA/17/LC response

327.2 John Attig said that there will be cases when a structured recording won’t be sufficient; he will ask the ALA task force to focus on notes. He noted that the task force’s charge is limited to chapter 3 but that isolating units from controlled vocabularies extends beyond chapter 3. There will be effects on the element set and the structure of the instructions but it is better to deal with the element set issues first. It is important to isolate quantity so can manipulate and isolate the captions.

327.3 Gordon Dunsire said it is important to isolate vocabulary from the rest of the string and from quantities. That will be desirable for making computations (e.g., a use case would be knowing how big the digitization of a collection would be). The problem is how far to go with the controlled vocabularies. The key is the data models. Also possible would be the description of carriers, unfinished work in RDA.

327.4 ALA was asked to develop proposals based on issues raised in the discussion paper. John Attig said extent for expression would also be added.

328 Manifestations and items – carriers: 6JSC/LC/17 (Reorganization of instructions for recording extent (3.4.1.3, 3.4.1.5))

328.1 Received and considered these documents:

6JSC/LC/17
6JSC/LC/17/ACOC response
6JSC/LC/17/ALA response
6JSC/LC/17/BL response
6JSC/LC/17/CCC response
328.2 Barbara Tillett said LC would accept the ACOC rewording for the Alternative in 3.4.1.3. The JSC accepted the proposal with the ACOC suggestion.

328.3 Christine Frodl said that the German constituency would like to amend the vocabulary in 3.3.1.3. Barbara Tillett said that any suggested additions should be send to Alan Danskin for discussion with the ONIX community rather than submitting additions as Fast Track entries.

Clean copies (this text will be merged with the reworded chapter 3 before it appears in the 2013 RDA Update of the RDA Toolkit):

### 3.4.1.3 Recording Extent

Record the extent of the resource by giving the number of units and an appropriate term for the type of carrier as listed under 3.3.1.3. Record the term in the singular or plural, as applicable. If the resource consists of more than one type of carrier, record the number of each applicable type. Specify the number of subunits, if applicable, as instructed under 3.4.1.7–3.4.1.9.

[examples unchanged]

---

**Alternative**

Use a term in common usage (including a trade name, if applicable) to designate the type of unit:

a) if the carrier is not in the list under 3.3.1.3

or

b) as an alternative to a term listed under 3.3.1.3, if preferred by the agency preparing the description.

EXAMPLE

- audio slide
- USB flash drive

If an applicable trade name or other similar specification is not used as a term designating the type of unit, record that information as instructed under 3.20.1.3.

[remainder of instruction unchanged]
3.4.1.5 Units Cannot Be Named Concisely

[1st paragraph & examples deleted; no change to content of existing 2nd paragraph and optional omission below]

the units cannot be named concisely, record the number of physical units and designate them as various pieces. Record the details of the pieces in a note if they are considered important for identification or selection (see 3.22.2.3).

EXAMPLE

Optional Omission

If the number of units cannot be readily ascertained or approximated, omit the number.

329.1 Received and considered these documents:

6JSC/LC/21
6JSC/LC/21/ACOC response
6JSC/LC/21/ALA response
6JSC/LC/21/BL response
6JSC/LC/21/CCC response/rev
6JSC/LC/21/CILIP response
6JSC/LC/21/DNB response

329.2 Kate James, speaking for LC, distributed a new proposal based on comments in responses, especially the CCC response. It was clear that LC hadn’t gone far enough in its original proposal. The new proposal removed “paginated” and “foliated.” The example at 3.4.5.5 was corrected and two examples added at 3.22.2.11.

392.3 John Attig said that ALA had disagreed with the original proposal; he would check with his constituency during the week to see if they would agree with the new proposal. Gordon Dunsire said he now shared John Attig’s concerns.
392.4 Kate James explained that possible situations in 3.4.5.3 were spelled out to synchronize with 3.4.5.2. The CCC suggestion for use of “in terms of” was accepted for 3.4.5.3.

392.5 [On November 7, John Attig reported that ALA agreed with the new LC proposal and Gordon Dunsire accepted it; the JSC accepted the new proposal. The JSC asked the Secretary to incorporate LC’s new proposal in the Sec final document for 6JSC/LC/21.]

Clean copies (minor changes were made after the meeting via JSC email; this text will be merged with the reworded chapter 3 before it appears in the 2013 RDA Update of the RDA Toolkit):

3.4.5.2 Single Volume With Numbered Pages, Leaves, or Columns

For a resource consisting of a single volume, record the extent in terms of pages, leaves, or columns as appropriate to the presentation used in the resource, applying the following general guidelines:

a) If the volume is numbered in terms of pages, record the number of pages.

b) If the volume is numbered in terms of leaves, record the number of leaves.

[sub-paragraphs c) and d) unchanged]

If the volume is numbered as leaves but has text on both sides, see 3.4.5.5 or make an explanatory note (see 3.22.2.11).

330.2 Change #1: JSC agreed in general with the proposal but with the following changes: add the wording "the text in" suggested in the CCC response for 3.13.1.3, use LC's new paragraph rather than CCC's new paragraph, and use LC's rewording about "none." John Attig will remove "jumbo braille" from the Layout vocabulary.

Delete the following instructions:

3.11.2 Layout of Cartographic Images
3.11.3 Layout of Tactile Music Notation
3.11.4 Layout of Tactile Text

Scope
For resources designed for persons with visual and tactile impairments, font size may also be used to represent the size and/or spacing of the raised dots representing characters and symbols (e.g., jumbo braille).

3.13.1.3 Recording Font Size

If the text in the resource is in a font size designed for persons with visual impairments, record the font size using an appropriate term from the list below.

- giant print
- large print
- jumbo braille

If none of the terms listed above is appropriate or sufficiently specific, use a term designating the font size as concisely as possible.

Glossary: deletion of three entries:

- Layout of Cartographic Images — The arrangement of a cartographic image or images in a resource consisting of one or more sheets.
- Layout of Tactile Music Notation — The arrangement of tactile musical notation in a resource (e.g., bar by bar, line by line).
- Layout of Tactile Text — The arrangement of tactile text in a resource (e.g., double-sided).

331 Manifestations and items – carriers: 6JSC/ALA/16 (Revision of RDA 3.19.3 for video encoding formats and addition of a new element for optical disc characteristics)

331.1 Received and considered these documents:

- 6JSC/ALA/16
- 6JSC/ALA/16/ACOC response
- 6JSC/ALA/16/BL response
- 6JSC/ALA/16/CCC response
- 6JSC/ALA/16/CILIP response
- 6JSC/ALA/16/DNB response
- 6JSC/ALA/16/EURIG response
331.2 John Attig said the proposal handles encoding formats separately from optical disc characteristics. Kevin Marsh said ACOC had asked if all the terms in 3.19.3.3 refer to encoding formats; Gordon Dunsire expressed the same concern.

331.3 Barbara Tillett said she prefers to refer to existing vocabularies (e.g., UK’s National Archive and LC have vocabularies); Christine Frodl and Kevin Marsh agreed. The third paragraph of 0.12 indicates substitute vocabularies may be used. Alan Danskin said the Bibliothèque nationale de France has vocabularies.

331.4 John Attig asked if he should withdraw the first part of the proposal and then do a proposal to remove the terms and point to lists. Barbara Tillett asked if there was agreement to remove vocabularies from RDA. Bill Leonard said that it was helpful to have vocabularies in RDA because they are easy to use and because catalogers would not be sure if other vocabularies would be available. John Attig said he would add revisions to terms as Fast Track entries.

331.5 John Attig said the second part of the proposal for a new element is at 3.20 rather than as a sub-instruction of 3.19 because the topic is about carrier characteristics, not file characteristics. There was not agreement about adding this new element.

331.6 John Attig said he would withdraw the entire proposal because ALA lacked the expertise needed for such a proposal; he will submit some of the glossary revisions as Fast Track entries. Christine Frodl will check if Deutsche Nationalbibliothek has such expertise. Alan Danskin said that Bibliothèque nationale de France has expertise; he could make an informal request via EURIG. Gordon Dunsire said he was interested in helping to work on this issue.

332 Manifestations and items – carriers: 6JSC/ACOC/6 (Revision of RDA 3.19.7.3, Recording transmission speed)

332.1 Received and considered these documents:

6JSC/ACOC/6
6JSC/ACOC/6/ALA response
6JSC/ACOC/6/BL response
6JSC/ACOC/6/CCC response
6JSC/ACOC/6/CILIP response
6JSC/ACOC/6/DNB response
6JSC/ACOC/6/LC response

332.2 Kevin Marsh said preparing the proposal wasn’t as easy as expected because experts had differing information. He said renaming the element “encoded bitrate” per LC’s response would alleviate some of the complexity but he thought there should be examples in the instruction.

332.3 John Attig expressed concern about renaming the element, indicating he wasn’t sure if the term is in common usage. ACOC said the information is not available
“on the surface” but that a cataloger would have to go into the metadata; capturing such technical metadata should be automatic.

332.4 JSC decided to accept LC's wording for the name of the element and the instructions and to include three examples, including the new example suggested by CCC. Bill Leonard will supply an explanation for that new example this week.

333.2 Bill Leonard said CCC was open to ACOC’s idea of renaming the appendix. John Attig expressed concern about changing the name without investigating the impact on other parts of the appendix (e.g., B.0).

333.3 JSC agreed to accept the proposal with the following changes: accept BL’s suggested rewording of the Alternative in B.1; change the name of the appendix. Revised name for appendix B = ABBREVIATIONS AND SYMBOLS

B.0 Scope

Appendix B provides instructions on the use of abbreviations when recording specified elements and on using symbols instead of abbreviations, when appropriate, as well as lists of abbreviations in a selected number of languages. These abbreviations and symbols are used when recording specified elements.

B.1 General Guideline

Use abbreviations and symbols prescribed under B.7–B.11 as instructed under B.2–B.6.

Alternative
When recording the attributes of a manifestation or item (see chapters 1–4), follow appropriate international standards on the use of abbreviations or of symbols for units or measurement; or, if the agency creating the data has established in-house guidelines on the use of abbreviations or of symbols for units of measurement, or has designated a published style manual, etc., as its preferred guide, use those guidelines or that style manual in place of the instructions given in this appendix.

---

**B.5.1 Dimensions**

Use abbreviations or symbols for units of measurement prescribed in B.7 for terms used for dimensions (see 3.5).

[2nd paragraph unchanged]

---

**B.5.2 Extent of Storage Space**

Use symbols, or abbreviations prescribed in B.7, for units of measurement when recording extent of storage space in non-metric units of measurement (see 3.4.1.11.2).

Metric symbols are not abbreviations; such symbols are not followed by a full stop.

---

**B.5.3 Duration**

Use symbols, or abbreviations prescribed in B.7, for units of measurement used for duration (see 7.22).

---

**B.5.7 Additional Scale Information**

Use symbols, or abbreviations prescribed in B.7, for units of measurement used as part of additional scale information (see 7.25.5).

334 RDA element set, RDA vocabularies, Open Metadata Registry, RDA glossary: 6JSC/ALA rep/4 (RDA Vocabularies: Miscellaneous Issues)

334.1 Received and considered this document:

6JSC/ALA rep/4
334.2 Issue #1: Singular and plural forms. Barbara Tillett agreed with the use of the singular form with the understanding that plural forms could be used in cataloging. Gordon Dunsire said that registries are things, not strings; the singular form is a label and lexical ontologies can generate plurals as needed. The JSC agreed that terms in the Open Metadata Registry should be given in singular form; any plural forms should be deleted before those vocabularies are published.

334.3 Issue #2: Duplicate or implied vocabularies. Gordon Dunsire said that the duplication caused by RDA instructions calling for the use of terms from a different vocabulary can be handled via application profiles; he suggested that he and John analyze this issue in conjunction with the task force continuing the work on 6JSC/ALA/17.

Action=ALA representative, CILIP representative

334.4 Issue #3: Fragmentary terms. Gordon Dunsire disagreed with other JSC representatives about not including fragments such as “approximately” or “incomplete” in the Registry because ISBD content terms have such adjectival qualifiers; he said the fragments could be in the Registry to say that they should not be used alone but combined with other terms. John Attig said that “[name of instrument] accompaniment” is a different situation and will be considered as part of work on medium of performance. Gordon Dunsire volunteered to study these and related issues.

Action=CILIP representative

334.5 Issue #4: Groups of Books of the Bible. The JSC had already decided to delete this vocabulary from the Registry because authority records exist for all the names. John Attig has deleted the terms from the Registry.

334.6 Issue #5: Single or multiple vocabularies. The JSC preferred having one general vocabulary for Extent rather than establishing subsets of a vocabulary for the different sub-instructions in RDA. Gordon Dunsire reminded the JSC that terms in vocabularies are not labels or terms for users. Barbara Tillett said she didn’t want the JSC to get too tied up in today’s technology or allow it to set limits. John Attig noted that the numbering in the Element set identifies elements and sub-elements as do some of the instructions. John Attig will remove Medium of performance terms from the Registry while the Library of Congress is work on development of such terms.

334.7 Issue #6: Top concepts. The broader terms used to identify categories within some vocabularies in RDA are not themselves valid terms for use in an RDA context. JSC decided that such broader terms should be included in the Registry for those communities whose application profiles indicate the preference for such broader terms. Alan Danskin said there is some value in such “bucket” terms. John Attig will prepare a proposal for the definitions of these broader terms.

Action=ALA representative
334.8 Issue #7: Digital representation of cartographic content. The past JSC discussion hadn't addressed the presence of “point” in both Date type and Object type vocabularies. Barbara Tillett said this unfinished task would be considered in the last executive session of this meeting. [Note: this topic was not discussed in the last executive session.]

334.9 Issue #8: “Selections” as Other distinguishing characteristic of an expression. The discussion of this issue was postponed until the discussion of 6JSC/LC/20.

334.10 Issue #9: Variant access point representing one or more librettos or other texts for musical works. The discussion of this issue was postponed until the discussion of 6JSC/ALA/13.

334.11 Issue #10: Groove characteristics. John Attig reported that he had published the terms for Groove pitch and Groove width as separate vocabularies. Alan Danskin noted that a later-developed overall vocabulary could point to these two vocabularies.

334.12 John Attig said that he hadn't yet worked on the task to divide Note on manifestation or item into two elements: Note on manifestation; Note on item. Action=ALA representative

335 RDA element set, RDA vocabularies, Open Metadata Registry, RDA glossary: 6JSC/ALA rep/5 (References in the RDA Glossary and the RDA namespace)

335.1 Received and considered this document:

6JSC/ALA rep/5

335.2 Recommendation #1. John Attig withdrew this recommendation to reinstate the “see” and “see also” labels in the Glossary in the RDA Toolkit.

335.3 Recommendation #2. The JSC agrees with this recommendation about see references from variant terms and scope notes when appropriate but requested a proposal.

335.4 Recommendation #3. The JSC agreed not to give “included” narrower terms as see references to broader terms. Gordon Dunsire noted that humans would be able to understand such references in context but including them in the Registry would be a falsehood. He also said that doing so would have raised many other questions about inclusion in the Registry.

335.5 Recommendations #4-#6, #8. The JSC agreed that broader/narrower term references should be made when appropriate and include scope notes as appropriate.

335.6 Recommendation #7. The JSC agreed to make references between related terms.
335.7 Recommendation #9. The JSC said that the basic principle is to make scopes and one-way references in the Glossary but give only a scope note in the Registry. This policy should be documented in the glossary policy document and possible in the Editor’s guide.

Action=Chair, Secretary

335.8 Recommendation #10. The JSC agreed not to make references for sibling relationships. Gordon Dunsire said there is not yet consensus in the vocabularies world on the usefulness of explicit references for sibling relationships although such references do exist in MulDiCat.

335.9 Kevin Marsh said he’d prefer that the RDA glossary not be considered a thesaurus with the extra requirements involved.

336 RDA element set, RDA vocabularies, Open Metadata Registry, RDA glossary:
6JSC/CILIP rep/1 (Machine-actionability and interoperability of RDA value vocabularies: a discussion paper)

336.1 Received and considered this document:
6JSC/CILIP rep/1

336.2 Recommendation #1. The JSC accepted the recommendation to separate definitions and scope notes in the vocabularies. Wording such as “Includes,” “Excludes,” “For example,” are scope notes. Nannette Naught said that they were not tagged consistently in the Toolkit; John Attig said they are explicitly coded in the Registry. Gordon Dunsire will prepare a proposal to find existing situations that need to be cleaned up.

Action=CILIP representative

336.3 Recommendation #2. The JSC agreed with the recommendation to update the documentation on the relationship between the Content type, Media type, and Carrier type vocabularies and the RDA/ONIX Framework. That relationship is not explicitly stated in the RDA text. John Attig agreed with Gordon’s statement that work cited in 6JSC/ALA rep/1 has not yet been carried out. Gordon agreed to assist John in the preparation of a document.

Action=ALA representative, CILIP representative

336.4 Recommendation #3. The JSC agreed with the recommendation that an RDF representation of the RDA/ONIX Framework be added to the Registry so other vocabularies can be mapped to it. Gordon Dunsire said it doesn’t matter what other communities are doing; the RDF would serve as a translation hub. He said that some users are already registering via VMF (Vocabulary Management Framework) but it is unclear if VMF will be maintained. Gordon said he would develop an RDF representation of the Framework and put it in the Registry as a separate vocabulary, doing a mapping between the Framework and the Registry. Alan Danskin, as ONIX liaison, will check with Graham Bell this week about ONIX paying for a joint namespace; the cost would be about $50 U.S. John Attig said that the mapping would be what was noted in 6JSC/ALA rep/1.
Action=BL representative, CILIP representative

336.5 Recommendation #4. The JSC agreed with Gordon Dunsire's intent to review the RDA value vocabularies/terms and the RDA/ONIX framework to identify possibilities for extending RDA's use of the Framework. Barbara Tillett asked him to keep Alan Danskin notified of work he was doing.  
Action=CILIP representative

336.6 Recommendation #5. The JSC asked Alan Danskin to contact the ONIX group about setting up a management and development group for the RDA/ONIX Framework.  
Action=BL representative

337 RDA element set, RDA vocabularies, Open Metadata Registry, RDA glossary:  
6JSC/CILIP rep/2 (RDF representations of RDA relationship designators)

337.1 Received and considered this document:

6JSC/CILIP rep/2

337.2 Recommendation #1. The JSC agreed that the qnames used in the Open Metadata Registry should be consistent and should include RDA branding. Developers use the qnames in local programs; they are also embodied in Google applications. Gordon noted that changing the qnames does not affect the URIs which can remain as they are. Gordon will make the qnames be consistent in the Registry and recommended that this practice be documented in a style guide for the Registry. Troy Linker will investigate the creation of a style guide.  
Action=CILIP representative, Troy Linker

337.3 Recommendation #2. The JSC agreed to continue representing RDA relationship designators as RDF properties.

337.4 Recommendation #3. The JSC agreed to add "Agent" as a super-class referring collectively to Persons, Families, and Corporate bodies. Gordon Dunsire said that the FRBR Review Group is looking at the same action. Barbara Tillett asked that Gordon stay in touch with the FRBR Review Group. Troy Linker asked if there would be any impact on the RDA Toolkit. John Attig replied that it would affect the Registry but Troy noted that it is part of the RDA data model.

337.5 Recommendation #4. The JSC discussed removing redundant unconstrained properties representing RDA relationship designators. To do so, definitions would be needed for the unconstrained properties. John Attig noted that the JSC has not been interested in developing such definitions. Troy Linker said the JSC should clarify definitions for the constrained and not worry about definitions for the unconstrained. Alan Danskin noted that the words are the same but people don't grasp the relationship to the entities. Alan and Barbara Tillett said that they didn't agree with the compiler example in the discussion
paper as being the same; Barbara Tillett said that the JSC would return to this topic later. Gordon said he would change the example.

337.6 Recommendation #5. The JSC agreed to having two separate namespaces, the unconstrained elements in a new namespace to be acquired by ALA Publishing and the constrained elements in the existing namespace; both will be considered as RDA content under JSC responsibility. Having the elements in separate namespaces removes the need to differentiate the same names with WEMI qualifiers. Last year the JSC agreed with Marg Stewart’s recommendation that the unconstrained be branded as an RDA namespace. John Attig said that one of the uses of the unconstrained is for mapping and asked if they needed to be in the data model for that to happen; Troy Linker said that you need “on ramps” in the model so that others can interact with the data. The mapping between the two namespaces could be done manually or MMA could be asked to do it. Gordon Dunsire said that the unconstrained URIs would need to be changed.

Action=ALA Publishing

[The discussion of 6JSC/CILIP rep/2 was interrupted by the discussion of 6JSC/ISBD/Discussion/2 and 6JSC/ISBD/Discussion/1; the discussion of 6JSC/CILIP rep/2 resumed. The resumed discussion is included here out of chronological order.]

337.7 Recommendation #6. Gordon Dunsire said he would remove unnecessary WEMI qualifiers when the unconstrained and constrained elements were in the separate namespaces. He would refer to the JSC any elements within one namespace needing differentiation.

Action=CILIP representative

337.8 Recommendation #7. The JSC agreed that inverse properties should be developed and registered for RDA relationship designators. Gordon Dunsire said that such actions are not required because other communities can do it but it is better that JSC do it. Gordon said it is a mechanical process. John Attig noted that this recommendation is depending on JSC agreement on recommendation #8.

Action=CILIP representative

337.9 Recommendations #8-#9, and #11. Gordon Dunsire said that replacing the existing labels with verbal phrases (recommendations #8-#9) would break the connection to the RDA Toolkit appendices I-K. Barbara Tillett said that both are needed (i.e., recommendation #11). Gordon said artificial instructions could be added to the RDA appendices. The JSC asked Gordon to prepare a proposal for May 2013 addressing the issues in recommendations #7-#9, #11.

Action=CILIP representative

337.10 Recommendation #10. Gordon Dunsire said that some bibliographic agencies concentrate on agents and roles, not relationships. RDA sidesteps the issue of classes. The JSC agreed with the recommendation not to represent RDA designators as RDF classes. Gordon said this section of the paper was included just for information in response to an earlier question from John Attig.
338  RDA element set, RDA vocabularies, Open Metadata Registry, RDA glossary:
6JSC/ISBD/Discussion/2 (Mapping of ISBD Area 0 vocabularies to RDA/ONIX Framework vocabularies as part of the ISBD/RDA alignment)

338.1 Received and considered these documents:

6JSC/ISBD/Discussion/2
6JSC/ISBD/Discussion/2/Mapping

338.2 This document was sent so late to the JSC due to the ISBD Review Group and IFLA meeting schedule. Gordon Dunsire wrote the initial draft of the mapping in his ISBD role. John Attig said that this document is half of the task and JSC needs to do its side.

338.3 Gordon Dunsire said that the goal stated during the 2011 JSC meeting in Glasgow of JSC/ISBD/ISSN discussion was to create interoperable records. The real issue for the ISBD RG is to have an RDF representation of the RDA ONIX Framework; the ROF is the hub to which both are pointing.

338.4 Gordon Dunsire said that the ISBD Review Group would appreciate comments on the mapping; he wants to make sure that the Review Group is clear that the JSC won’t use Area 0. John Attig said that the JSC should do a comparable mapping and share the results to evaluate how successful the mappings were. Alan Danskin said output from the two mappings would be the first issue and JSC would welcome a future proposal.

338.5 Barbara Tillett will prepare a draft mapping for JSC review. Then Christine Frodl, as ISBD liaison, will convey the JSC response to the ISBD Review Group.
Action=Chair, DNB representative

339  RDA element set, RDA vocabularies, Open Metadata Registry, RDA glossary:
6JSC/ISBD/Discussion/1 (Alignment of the ISBD element set with RDA element set – RDA, Appendix D.1)

339.1 Received and considered these documents:

6JSC/ISBD/Discussion/1
6JSC/ISBD/Discussion/1/Alignment

339.2 Gordon Dunsire explained that the ISBD XML Study Group hadn’t been funded by IFLA to have a meeting to work on the RDA to ISBD alignment. The group worked on this document via email but recognized the asymmetric and granularity issues. Barbara Tillett said that the RDA elements relating to access, approximately 30%, are out of scope for ISBD and were not included in the alignment.

339.3 John Attig said the JSC could review the alignment and send comments to the ISBD group. Kevin Marsh asked if the JSC would be redoing the ISBD work or
doing the RDA side of the mapping. The JSC decided not to do the mapping from the other side but to send comments. Barbara Tillett said that she could share her comments with the JSC for others to add their comments. Christine Frodl, as ISBD liaison, can notify her ISBD colleagues that the JSC will be sending them feedback.

**Action=Chair, DNB representative**

[Note that 5JSC/Policy/3 and 6JSC/Sec/6 in the agenda were included for background during the discussion but were not discussed.]

### 340 Persons: 6JSC/BL/4 (Other designated associated with the person: Revision of RDA 9.0, 9.6.1, and 9.19.1)

340.1 Received and considered these documents:

- 6JSC/BL/4
- 6JSC/BL/4/ACOC response
- 6JSC/BL/4/ALA response
- 6JSC/BL/4/CCC response
- 6JSC/BL/4/CILIP response
- 6JSC/BL/4/DNB response
- 6JSC/BL/4/LC response

340.2 Alan Danskin explained that the BL proposal is related to the goal of trying to avoid undifferentiated headings; it introduces more flexibility for qualifiers.

340.3 Bill Leonard said that CCC urged caution about changing the definition of “person” at this time because the FRBR Review Group is revising the definition as part of the reconciliation with FRAD. Barbara Tillett said that it is really “individual” that is meant but that the *International Cataloguing Principles* settled on “person” due to language issues.

340.4 Change #1. The JSC agreed to the change to 9.0 as amended by ACOC.

340.5 Change #2. The JSC agreed to the wording proposed by LC restricting when the element is core. Christine Frodl noted that the German constituency would like to expand beyond Christian saints in RDA 9.6.1.4.

340.6 Change #3. The JSC agreed to the change.

340.7 Change #4. The JSC agreed to the LC wording for 9.6.1.6; the JSC agreed to the proposed 9.6.1.7 and 9.6.1.8. Christine Frodl requested that more examples be added. Kate James, with assistance from Alan Danskin, will send additional examples to the Secretary by November 30.

**Action: Kate James, BL representative**

340.8 Change #5. Barbara Tillett and John Attig said that the instruction was too broad; Barbara said that some of the examples represent other attributes. Alan
Danskin showed examples from older materials and Gordon Dunsire said the situation occurs often in Scotland. John Attig said that the Program for Cooperative Cataloging was discussing having separate authority records with the same text string. The JSC agreed to the new instruction. Alan Danskin will send other examples to Kate James.

**Action=Kate James, BL representative**

**Clean copies** (changes needed in appendix E were noted in LC’s response to 6JSC/LC/16/Sec final; the deletion of three examples for the first paragraph and the addition of a third exception in 9.19.1.2 are from 6JSC/LC/16/Sec final; the revision of the fourth paragraph in E.1.2.2 is from 6JSC/LC/3/Sec final. This text will be merged with the reworded chapters before they appear in the 2013 RDA Update of the RDA Toolkit):

345.2 Alan Danskin said he could add an explanation to the example 9.19.1.7 to address ACOC's concern and add wording excluding gender or marital status in the second paragraph of 9.4.1.1 to address LC's first comment. He disagreed with LC's conclusion in the fifth comment in the LC response.

345.3 Alan Danskin will prepare a revised proposal by the end of November 2012; JSC responses will be due by February 1, 2013. [Later in the week Alan distributed 6JSC/BL/3/rev to the JSC. The actions below are based on that revision.]

345.4 The JSC agreed to the change in 9.4.1.1 of the revised proposal. JSC discussed the revised examples in 9.19.1.7: deleted the "Young, Thomas, Rev" example and asked the Secretary to check the wording in the explanations of the other examples. The JSC agreed to the proposal as revised.

347.3 The JSC also agreed with LC’s recommendation in its response to remove the exception in 11.5.1.3. The JSC asked the Examples Group to update the examples in 11.13.1.8 and to check if other examples need to be updated.

**Action:** Examples Group

347.4 John Attig agreed with the comment in the DNB response that the JSC should look at some attributes that really are relationships.

353.2 Kevin Marsh expressed ACOC’s concerns about combining changes in media type and in carrier type in the same instruction. John Attig noted that both are elements related to carriers, the subject of chapter 3. Gordon Dunsire noted that media type is embedded in carrier type.

353.3 The JSC accepted LC’s rewording for both 1.6.2.2 and 3.1.6.1.

354.2 Barbara Tillett said she recommended that the request from the ISSN Network for direction on this topic be answered by forwarding information from the JSC constituency responses and encourage the ISSN Network to send proposals.

354.3 Gordon Dunsire noted, per the last paragraph of the CILIP response, that mode of issuance is a carrier attribute at the manifestation level in the RDA/ONIX Framework.

354.4 Barbara Tillett will respond to the discussion paper on behalf of the JSC.

355 Number of records: 6JSC/ISSN/2 (Major title changes for serials in Chinese, Japanese and Korean (RDA 2.3.2.13.1, ISBD A.2.6.1 and ISSN 2.3.1), discussion paper about the "first five words" rule)

355.1 Received and considered these documents:

   6JSC/ISSN/2
   6JSC/ISSN/2/ACOC response
   6JSC/ISSN/2/ALA response
   6JSC/ISSN/2/CCC response
   6JSC/ISSN/2/CILIP response
   6JSC/ISSN/2/DNB response
   6JSC/ISSN/2/LC response

355.2 Barbara Tillett summarized the responses to this discussion paper: ACOC feels the "first five word" rule is a useful rule of thumb for those languages where it can be applied but recognizes it can’t be supplied is some languages (would add Thai to the list); ACOC feels it would be better to keep the instruction for when it can be easily applied and to have another generic instruction for other languages. ALA encourages investigation by the ISSN Network and notes that the lack of non-roman scripts in the ISSN Portal only compounds the problem; John Attig added that he had an email from Françoise Pelle that she had received comments from the CEAL community and would take them under advisement. BL, CCC, CILIP, DNB, and LC to conduct the test. DNB notes that any change would result in a change in harmony with ISBD.

355.3 Gordon Dunsire reported that the ISSN Network had decided at its annual meeting in October that they would keep the instruction about the first five words; so, the focus for the work will be conducting a test related to the 3rd option to consider additional rules just for Chinese, Japanese, and Korean titles.

355.4 Barbara Tillett will respond to the discussion paper on behalf of the JSC, forwarding comments from the constituency responses, encouraging them to retain the instruction about the first five words, and encouraging them to submit a proposal for CJK titles.

6JSC/EURIG/2/LC response

356.2 Alan Danskin, as EURIG chair, presented the proposal. He noted that the proposal was primarily the work of Bibliothèque nationale de France. Alan said that the British Library thinks there would be value in having date sub-types so that there can be a machine-match on the correct date.

356.3 Barbara Tillett said that LC proposed a rewording of the EURIG revision of the scope statement at 6.10.1.1 to give more guidance to catalogers. The JSC agreed to the change in scope statement at 6.10.1.1, changing “supply” to “record.” The JSC disagreed with the remainder of the proposal citing the proposed mixture of manifestation and expression elements in the qualifier and the need to consult with various communities about appropriate dates.

356.4 Alan Danskin will reply to EURIG about the JSC decision on this proposal; the British Library will prepare a proposal for date sub-types and will investigate if 6.4.1 for Date of work should also be included in that proposal.

6.10.1.1 Scope

Date of expression is the earliest date associated with an expression. The date of expression may represent the date a text was written, the date of final editing of a moving image work, the date of first broadcast for a television or radio program, the date of notation for a score, the date of the recording of an event, etc.

If no specific date can be identified as the date of expression, the date of the earliest manifestation embodying the expression may be used to record a date of expression.

[last paragraph unchanged]
357 Expressions: other than music: 6JSC/EURIG/3 (Language of expression - Revision of RDA 6.11, 6.11.1.3, 6.11.1.4, 7.12.1.3, 26.1.1.3)

357.1 Received and considered these documents:

6JSC/EURIG/3
6JSC/EURIG/3/ACOC response
6JSC/EURIG/3/ALA response
6JSC/EURIG/3/BL response
6JSC/EURIG/3/CCC response
6JSC/EURIG/3/CILIP response
6JSC/EURIG/3/DNB response
6JSC/EURIG/3/LC response

357.1 Alan Danskin said the British Library agreed with the intent of providing more specific information did not agree with the methodology to use qualifiers to give that information. He said it was thought that using sub-elements would be a more principled approach.

357.2 Kevin Marsh said ACOC agreed that this element should be core; other JSC members also agreed but there was not consensus in the responses about the wording of the core statement. The JSC decided to delete the conditional statement for the core status at 6.11.

357.3 John Attig agreed with LC that the qualifiers EURIG wants to add are really relationships.

357.4 Gordon Dunsire noted that language is a character attribute of content carrier (spoken word, tactile text, text – corresponding to three senses of hearing, feeling, seeing). He wanted to see this in the context of the RDA/ONIX Framework.

357.5 Gordon Dunsire said it is the same question discussed earlier of relationship designators vs. value vocabularies. EURIG’s proposal specifies a vocabulary for qualifiers.

357.6 Alan Danskin said it is important to know explicitly which is the original expression rather than that being signaled by the absence of information.

357.7 The JSC did not agree to the proposed changes to examples in 7.12.1.3 and 26.1.1.3.

357.8 Alan Danskin will go back to Bibliothèque nationale de France to discuss the next steps to modify the proposal. He said the changes proposed for 7.12.1.3 would not be pursued and the proposal to add instructions for translations at 26.1.1.4 would be withdrawn.

6.11 Language of Expression

CORE ELEMENT

Language of expression is a core element when needed to differentiate an expression of a work from another expression of the same work.

358 Expressions: other than music: 6JSC/EURIG/1 (Language of expression - Revision of RDA 6.11, 6.11.1.3, 6.11.1.4, 7.12.1.3, 26.1.1.3)

6JSC/EURIG/1/CCC response
6JSC/EURIG/1/CILIP response
6JSC/EURIG/1/DNB response
6JSC/EURIG/1/LC response

358.2 Barbara Tillett said LC was concerned about the addition of music examples to 6.12.1.3 because there is a separate instruction for music (6.18). John Attig said examples for dramatic work performers could be added at 6.12.1.3 instead.

358.3 The JSC agreed that there are problems with the 6.18 instruction and asked the Secretary to contact the RDA Music Joint Working Group look at how 6.18 could be improved and to consider these examples.

Action=Secretary

358.4 Alan Danskin asked if the example being proposed for addition to 6.27.3 is in the right place. 6.27.3 sends the cataloger back to 6.27.1 for some categories for music.

358.5 Alan Danskin withdrew the proposal for EURIG. The British Library will consider proposing some non-music examples as Fast Track entries.

359 Question from Mark Ehlert

359.1 Judy Kuhagen distributed an email from Mark Ehlert, forwarded earlier to the JSC, about an example in ch. 25 that was for a manifestation relationship (special issue). The JSC agreed that this example should be deleted and asked the Secretary to reply to Mark Ehlert.

Action=Secretary
359.2 JSC comments to the email raised questions about the use of relationship designators in examples. There had been an earlier JSC decision not to include the qualifiers present with the designators in appendix J when indicating the relationships in examples. Yet, the instruction at 0.10 refers to the terms in appendix J ("The authorized access point or structured description is preceded by an introductory phrase with the applicable relationship designator (see Appendix J).”). The example in 0.10 after the quoted sentence does not use the form of the designator in appendix J.

359.3 John Attig said he hoped that the parenthetical qualifiers in the relationship designators would disappear; he would put them in now and then remove them later. He also said distinctions could be made between structured descriptions and identifiers/authorized access points. Bill Leonard said he thought the intent was not to display such qualifiers and he expressed sympathy for users trying to understand such qualifiers.

359.4 The JSC decided not to change RDA now but asked the Secretary to update the FAQ on the JSC site to address this issue, add the issue to the list for future action, and reply to Mark Ehrlert that the JSC is considering relationship designators in general.

360.2 John Attig said that ALA accepted the editorial comment from BL and the additional changes at 6.274.1 and 6.281.1 noted by CCC. JSC agreed.

360.3 John Attig noted that the changes affect the vocabulary for this element. The Secretary will send the table.

364.3 Change 1: For 6.28.1.5.2, JSC disagreed with the addition of the Rzewski example; agreed to the addition of the Hogan example, with the addition of explanatory text: "Incorporates new material resulting in a new work"; agreed to replace the Elling example with one that more clearly illustrates creator roles; agreed to the LC wording for the new paragraph on unknown adapters; and agreed to a new example at 6.17.1.8 proposed by CCC. John Attig will propose definitions for “adaptation” and “arrangement” via Fast Track entries based on the 6.28.1.5.1 categories.

364.4 Change 2: For 6.28.3.2.2, JSC disagreed with adding the word “traditional” to the “e.g.” statement in the instruction and including it as part of the explanation for the new Deep river example; the final decision was not to change the paragraph in the instruction but to add the Deep river example with a reworded explanation. Christine Frodl said it was important to have definitions for terms such as “traditional,” “pop,” and “folk” because there are differences between the Anglo-American and European use of such terms. Kathy Glennan said that such terms were being discussed by those working on the music genre/form vocabulary. John Attig suggested that the broader issues of such categories and the appropriate terminology be referred to the RDA Joint Music Working Group and asked that the Secretary notify the group. Christine Frodl recommended that European colleagues be consulted; Barbara Tillett suggested that a European member be added to the RDA Joint Music Working Group.

**Action=Secretary**

364.5 Gordon Dunsire asked if there was a principle that only examples that referred to what was listed in an “e.g.” statement in the instruction could be included with that instruction. 367.2 Alan Danskin presented the proposal on behalf of EURIG. He noted that EURIG now agrees with the BL response that "arranged" should be used in all cases.

367.3 John Attig and Barbara Tillett disagreed with the additions specified in 6.18.1.4 and 6.28.3.2.1 because they represent attempts to deal in an access point string what could be done in different ways.

367.4 Gordon Dunsire that there are problems with the term “transcription” because there are different definitions for that term used in RDA. John Attig will propose definitions for RDA via Fast Track entries.

**Action=ALA representative**

367.5 Alan Danskin indicated that EURIG was making this proposal for the people who want to identify each separate expression.

367.6 Kathy Glennan noted that Medium of performance is in RDA only at the work level but this proposal has it also at the expression level. John Attig said that FRAD has it at both levels. Kathy said there was interest by music catalogers to expand medium of performance, key, and numeric designation to the expression level. John asked if the RDA Joint Music Working Group was aware of this topic. Kathy said that the Program for Cooperative Cataloging task group on expression records had submitted its report to the PCC Policy Committee this week.

367.7 Alan Danskin said EURIG was setting up a music group and then it could be involved in by having a member added to the RDA Joint Music Working Group. As EURIG Chair, Alan withdrew the proposal in light of the larger issues being addressed.

367.8 The Secretary was asked to notify the RDA Joint Music Working Group of the interest in adding medium of performance, key, and numeric designation at the expression level. John Attig noted that key and numeric designation are not in FRAD at the expression level. Barbara said that the JSC could notify FRAD if the RDA Joint Music Working Group made a proposal.

368 Music: works and expressions: 6JSC/EURIG/Discussion/1 (Musical arrangements: discussion paper)

368.1 Alan Danskin reported that he’d received an email from Françoise Leresche withdrawing this discussion paper.

369 Music: works and expressions: 6JSC/IAML/1 (Revision of RDA 2.5.2.1, 2.5.2.2 Designation of Edition, addition in Chapter 2 of a core element for Format of Notated Music Statement …)

369.1 Received and considered these documents:

- 6JSC/IAML/1
- 6JSC/IAML/1/ACOC response
- 6JSC/IAML/1/ALA response
- 6JSC/IAML/1/BL response
- 6JSC/IAML/1/CCC response
- 6JSC/IAML/1/CILIP response
- 6JSC/IAML/1/DNB response
- 6JSC/IAML/1/LC response

369.2 Barbara Tillett noted that the JSC constituencies other than ACOC and DNB disagreed with the proposal. John Attig noted that there were different opinions within ALA but even those seeing the Musical presentation statement in AACR2 as something different from edition statements didn’t agree with the IAML decisions.

369.3 Gordon Dunsire said that ISBD has changed the term to music format statement. Judy Kuhagen noted that the RDA Format of notated music (7.20.1.3) has a controlled vocabulary but IAML is addressing a transcribed element as Format of notated music statement.

369.4 Alan Danskin said the IAML proposal doesn’t add anything not already covered in RDA.

369.5 Kathy Glennan said that there is a proposal to MARBI to allow repeatability of field 250 for edition statements.

369.6 The JSC decided to disagree with the IAML proposal. Barbara Tillett will respond to IAML explaining why JSC disagrees, including the preference to emphasize similarities rather than differences and to allow the inclusion of a statement of responsibility. The JSC would welcome a follow-up proposal from IAML for a sub-element of the edition statement for musical presentation information.

370 Works: other than music: 6JSC/ACOC/5 (Compilations in RDA chapter 6, Discussion paper)

370.1 Received and considered these documents:

6JSC/ACOC/5
6JSC/ACOC/5/ALA response
6JSC/ACOC/5/BL response
6JSC/ACOC/5/CCC response
6JSC/ACOC/5/CILIP response
6JSC/ACOC/5/DNB response
6JSC/ACOC/5/LC response

370.2 Kevin Marsh said that reading the constituency responses put his initial concerns to rest. He will submit some Fast Track entries to add references per LC’s comment in its response. ACOC will make a proposal for choosing the preferred title per CCC’s comment in its response.

371 Works: other than music: 6JSC/LC/19 (Additional instructions for preferred sources and preferred titles in different languages or scripts (RDA 2.2.3.1 and 6.2.2.4))

371.1 Received and considered these documents:

6JSC/LC/19
6JSC/LC/19/ACOC response
6JSC/LC/19/ALA response
6JSC/LC/19/BL response
6JSC/LC/19/CCC response
6JSC/LC/19/CILIP response
6JSC/LC/19/DNB response

371.2 Barbara Tillett said that LC agreed with the modifications suggested in the CCC response. JSC agreed with the proposal and the CCC modifications.

Clean copy (this text will be merged with the reworded chapters before they appear in the 2013 RDA Update of the RDA Toolkit):

2.2.3.1 Preferred Sources of Information in Different Languages or Scripts

[1st paragraph & sub-paragraphs a)-d) unchanged; sub-paragraph e) and last paragraph added]

e) the source in the language or script preferred by the agency preparing the data, if the resource is formatted tête-bêche, as a head-to-head bound monograph, or as a head-to-tail bound monograph.
If none of the categories is applicable, choose one of the sources of information as the preferred source.

6.2.2.4 Works Created after 1500

[1st-2nd paragraphs & examples unchanged; new 3rd paragraph added]

If the work is published simultaneously in different languages and the original language cannot be determined, choose the title proper of the first resource received as the preferred title. If the language editions are in the same resource (e.g., a work issued with the same text in French and English), choose the title proper named on the preferred source of information as the preferred title.

[remainder of instruction unchanged]

372 Works: other than music: 6JSC/CCC/6 (Instruction for choosing the preferred title for choreographic works (RDA 6.2.2.4))

372.1 Received and considered these documents:

6JSC/CCC/6
6JSC/CCC/6/ACOC response
6JSC/CCC/6/ALA response
6JSC/CCC/6/BL response
6JSC/CCC/6/CILIP response
6JSC/CCC/6/DNB response
6JSC/CCC/6/LC response

372.2 Bill Leonard noted that the proposal incorporates the Library of Congress policy statement at 6.27.1.9 and reflects current practice as illustrated by examples in RDA (e.g., Cinderella).

372.3 The BL and DNB disagreed with the proposal because it allows the use of a title in other than the original language as the preferred title. Alan Danskin said he didn’t see a reason to make a distinction for choreographic works; such an exception should be in a policy statement or in a local application profile.

372.4 Barbara Tillett noted that there will be cultural differences around the world; variant forms could be added for access as noted in the DNB response.

372.5 Kate James said that the Library of Congress had considered extending its policy beyond choreographic works to art works but hadn’t wanted to address this topic yet. LC also wanted to soften the “extensive adaptation” wording in the policy statement. She said that choreographic works are not musical works. Such a policy could apply to non-textual works.
372.6 The JSC considered revising the LC policy statement language but Christine Frodl said she wanted consistency in the rules and agreed with Alan Danskin that there wasn’t a reason for making a distinction for choreographic works.

372.7 Bill Leonard agreed to withdraw this CCC proposal and will do a broader proposal for choreographic works and works of art as well as consider the impact on the basic instruction.

372.8 The JSC agreed to leave the existing examples as they are.

373 Works: other than music: 6JSC/LC/20 (Revisions to RDA Chapter 6 to treat "Selections" as a work attribute)

373.1 Received and considered these documents:

- 6JSC/LC/20
- 6JSC/LC/20/ACOC response
- 6JSC/LC/20/ALA response
- 6JSC/LC/20/BL response
- 6JSC/LC/20/CCC response
- 6JSC/LC/20/CILIP response
- 6JSC/LC/20/DNB response

373.2 The ALA response had expressed concern about the impact of the proposed changes on existing headings. Gary Strawn said that some details would need to be decided but that these changes in the LC/NACO authority file could be handled automatically.

373.3 Barbara Tillett withdrew changes 6 and 8 in the proposal because the JSC had already agreed to changes for those instructions in 6JSC/CCC/7. She said that LC agrees with the correction noted in the ALA response for change 2.

373.4 The JSC agreed to the revisions in changes 1-5 and 7 including the ALA correction for change 2.

**Clean copy** (minor revisions were made after the November meeting via JSC email; this text will be merged with the reworded chapter 6 before it appears in the 2013 RDA Update of the RDA Toolkit):

374 Works: other than music: 6JSC/ALA/5 (Revision of RDA 6.21 (Other distinguishing characteristics of a legal work) and 6.29.1.33 (Additions to access points representing treaties, etc.))

374.1 Received and considered these documents:

- 6JSC/ALA/5
- 6JSC/ALA/5/ACOC response
- 6JSC/ALA/5/BL response
- 6JSC/ALA/5/CCC response
- 6JSC/ALA/5/CILIP response
- 6JSC/ALA/5/DNB response
- 6JSC/ALA/5/LC response

374.2 John Attig said this ALA proposal was a follow-up from the Glasgow JSC meeting and included wording from the LC policy statement about using key words from the title proper as qualifiers.

374.3 Gordon Dunsire asked why the full title proper was not used. As an element in its own right, the full title proper could be “dropped” into the string that is the authorized access point; he said there would likely be a transition period when machines will create the strings. He said that CILIP wanted to raise this question but that CILIP did support the proposal.

374.4 The JSC agreed to the ALA proposal as written.

**Clean copy** (this text will be merged with the reworded chapter 6 before it appears in the 2013 RDA Update of the RDA Toolkit):

375 Works: other than music: 6JSC/BL/8 (Change to 19.3 and Appendix I. Recording relationships to persons, families, and corporate bodies associated with works of unknown or uncertain origin)

375.1 Received and considered these documents:

6JSC/BL/8
6JSC/BL/8/ACOC response
6JSC/BL/8/ALA response
6JSC/BL/8/CCC response
6JSC/BL/8/CILIP response
6JSC/BL/8/DNB response
6JSC/BL/8/LC response

375.2 Alan Danskin said that this proposal came from rare book colleagues. He acknowledged from the JSC responses that the proposal was not the way to accomplish the intent of the proposal. He withdrew the proposal and said that the British Library would submit a new proposal for the 2013 meeting.

375.3 Barbara Tillett noted that all the JSC constituencies had supported the intention of the proposal.
376 Works: other than music: 6JSC/ALA/15 (Hearings in RDA 19.2.1.1.1)

376.1 Received and considered these documents:

6JSC/ALA/15
6JSC/ALA/15/ACOC response
6JSC/ALA/15/BL response
6JSC/ALA/15/CCC response
6JSC/ALA/15/CILIP response
6JSC/ALA/15/DNB response
6JSC/ALA/15/LC response

376.2 John Attig said that the proposal resulted from looking at 6JSC/LC/6 approved by the JSC in Glasgow in 2011 to include hearings as events under the category for collective thought of the corporate body. ALA thought that the resources should be under the corporate bodies holding the hearings; all but CILIP agreed. Gordon Dunsire said that CILIP felt that hearings do fall under the collective-thought category as a matter of principle, not of convenience. Kevin Marsh said ACOC agreed in part with CILIP but thought the approach in the ALA proposal was clearer.

376.3 Kate James said that hearings are similar to trials which are not considered corporate bodies. Rhonda Lawrence said that law librarians do not think of hearings as corporate bodies. She said that hearings must be under the responsible corporate bodies; hearings under title would cause chaos because the titles proper are generic with no useful keywords until 10+ words into the titles. John Attig asked if Rhonda’s comments were applicable outside the U.S.; she replied that she didn’t know because she hadn’t cataloged hearings from other countries.

376.4 John Attig said ALA accepted the BL comment to add “judicial” to the revised text.

376.5 Gordon Dunsire said he would accept the proposal on behalf of CILIP. John Attig said he would take ACOC’s comments about possible changes to 11.2.2.18 and 11.2.2.19 back to ALA. The JSC agreed to the proposal with the addition of “judicial” and “corporate” to new category c).

Clean copy (changes to the examples in the “Works Reporting the Collective Activity of a Conference, Expedition, or Event” example block in RDA 19.2.1.3 are from the change to RDA 11.5.1.3 shown in 6JSC/ALA/6; this text will be merged with the reworded chapter 19 before it appears in the 2013 RDA Update of the RDA Toolkit):

**377 Corporate bodies: 6JSC/ALA/18 and addendum (Proposed Revision of RDA Instructions for Government and Non-Government Corporate Bodies)**

377.1 Received and considered these documents:
Kevin Randall, chair of the ALA task group, joined the JSC for the discussion.

Recommendation #1: The JSC agreed that RDA 11.2.2.13-11.2.2.14 should cover all types of subordinate bodies and that RDA 11.2.2.18-11.2.2.20 should be deleted.

Recommendation #2: The JSC agreed to incorporate the instructions for Type 1 government bodies (RDA 11.2.2.19) into the instructions for Type 1 general bodies (RDA 11.2.2.14).

Recommendation #3: The JSC agreed to incorporate the instructions for Type 2 government bodies (RDA 11.2.2.19) into the instructions for Type 2 general bodies (RDA 11.2.2.14). The JSC agreed to add the CCC wording “in the terminology of the higher body concerned”.

Recommendation #4: The JSC agreed to incorporate the instructions for Type 3 government bodies (RDA 11.2.2.19) into the instructions for Type 3 general bodies (RDA 11.2.2.14). The JSC agreed to add the LC wording “(e.g., contains neither distinctive proper nouns or adjectives, nor subject words).”

Recommendation #5: The JSC agreed to incorporate the instructions for Type 4 government bodies (RDA 11.2.2.19) into the instructions for Type 4 general bodies (RDA 11.2.2.14) and to omit the provision of RDA 11.2.2.19 that the name of subordinate body not contain the name of the government (the omission not resulting in any significant change in meaning or application).

Recommendation #6: The JSC agreed not to make any change for Type 5 non-government bodies.

Recommendation #7: The JSC agreed to move the instructions for Type 5 government bodies from RDA 11.2.2.9 to RDA 11.2.2.14 as new Type 6. (Note: The order of this instruction and the retained Type 6 for non-government bodies was reversed in the final document.)

Recommendation #8: The recommendation to eliminate Type 6 for non-government bodies (a name that includes the entire name of the higher or related body) was not supported by the ACOC and BL responses; they
supported the retention of Type 6 to ensure consistency and collocation. John Attig said the major impact is on conferences as subordinate bodies; some fall under Type 3 but presentation affects the result.

Kate James said that Type 3 also applies to annual meetings, causing confusion. Kevin Marsh said the original form cannot be reconstructed and so there would be no way to use global change to update records. John Attig said the original forms would be in statements of responsibility or in source citations in authority records. Gary Strawn noted that these headings would have to be handled one by one for updating to RDA form because a machine fix wouldn’t be possible.

Kate James said that catalogers have trouble understanding “entire name of body.” The form is an accident of which resource is received first and there are even variations in the same resource. She suggested entering directly and including see references for the subordinate forms to address BL’s concerns. John Attig replied that references are not core elements.

Alan Danskin said that it isn’t possible to fix access points retrospectively and eliminating Type 6 won’t improve consistency in the future; he recommended retaining Type 6. Bill Leonard noted that the future is longer than the past. John Attig said that ALA had proposed this change to current practice but doesn’t want to incur the costs of a change if not all are committed to the deletion of Type 6.

Judy Kuhagen asked if the same “In case of doubt” wording from Type 3 (“In case of doubt, record the name of the body directly”) should be added to the retained Type 6 for non-government bodies. John Attig suggested instead that this wording be removed from the Type 3 instruction and given as the third paragraph at 11.2.2.14 to apply to all types.

The JSC agreed not to delete the instruction for Type 6 non-government bodies; it would be new Type 6 in 11.2.2.14. The JSC did agree to move the “In case of doubt” wording and examples from Type 3 to the position of third paragraph in 11.2.2.14.

377.11 Recommendation #9: The JSC agreed to move the instructions for Types 6-11 from RDA 11.2.2.19 to RDA 11.2.2.14 as now renumbered Types 8-9, 11-14 (with slightly different order). The JSC also agreed to add an instruction for constitutional conventions, based on the first paragraph of 11.2.2.23, as renumbered Type 10.

377.12 Recommendation #10: The JSC agreed to the revision of 11.2.2.21 as new 11.2.2.18 so that it applies to all levels of government with the deletion of “that have existed in post-medieval times” as suggested by LC and the deletion of “only” in “only to officials.”

Alan Danskin raised EURIG’s concerns about including ruling executive bodies as 11.2.2.21.2 under the 11.2.21 instruction for officials. Addressing this situation would require a separate proposal.
Recommendation #11: The JSC did not agree to revise 11.2.2.22.2 as 11.2.2.19.2 to make the exception for the practice for U.S. legislative subcommittees at 11.2.2.22.3 be the instruction. The JSC agreed to keep the instruction at 11.2.2.22.2 be the renumbered 11.2.2.19.2 and to move the 11.2.2.22.3 content to be an exception at 11.2.2.19.2.

Recommendation #12: The JSC agreed to remove the general instructions for subordinate religious bodies (RDA 11.2.2.30) and add types to 11.2.2.14 (referencing the types of religious bodies covered in 11.2.2.28-11.2.2.31, renumbering them as 11.2.2.25-11.2.2.29. The JSC also agreed to add wording to the beginning of 11.2.2.15 that the instruction apply unless other instructions are given later.

Recommendation #13: The JSC agreed to move the instruction for Catholic dioceses, etc., from 11.2.2.30.2 to 11.2.2.30.1 as an exception.

The JSC agreed to take under advisement the issues for the future identified in the ALA proposal.

The JSC did not agree to the ACOC recommendation to merge Types 3 and 5 in 11.2.2.14. The JSC did not agree to ACOC’s request for a new provision to 11.2.3.7 for a variant name for the name entered subordinately; John Attig said that examples of such a situation are already in 11.2.3.7.

The JSC did agree to the LC recommendation to merge Types 7 and 15 in 11.2.2.14 but not to merge proposed 11.2.2.18 and 11.2.2.20. The JSC did not agree to the LC recommendation to merge Types 3 and 16 or to distribute content of Type 17 under Types 6, 8, and 10.

The JSC agreed to the CCC proposal for additional wording in the second paragraph of proposed 11.2.2.14 but to use “type of body” instead of “agency.”

The JSC agreed to the LC suggestion (1) to replace the “type” numbering in 11.2.2.14 with another level of instruction (e.g., 11.2.2.14.1 rather than 11.2.2.14, Type 11) to allow for hierarchical display in the RDA Toolkit Browse Tree and (2) to give a descriptive phrase for each type rather than a type number. The Secretary will send out this revised structure to the JSC within two weeks with comments due by the JSC the first or second week of January.

Action=Secretary

The JSC referred the task of examples for the revised instructions to the Examples Group. John Attig noted that the Addendum to the proposal lists candidate examples from the merger of existing instructions. Judy Kuhagen noted that only the first seven types of 11.2.2.14 would have examples because the remaining types are references to other instructions; those other instructions would have examples. The JSC agreed that the Examples Group should decide which examples to include and asked that there be a good international mix as well as a mix of government and non-government bodies. The Examples Group and the Secretary will work out the timeline for this work.

381 Places: 6JSC/ALA/19 (Proposed Revision of RDA 16.2.2 (Preferred Name for the Place))

381.1 Received and considered these documents:

- 6JSC/ALA/19
- 6JSC/ALA/19/ACOC response
- 6JSC/ALA/19/BL response
- 6JSC/ALA/19/CILIP response
- 6JSC/ALA/19/DNB response
- 6JSC/ALA/19/EURIG response
- 6JSC/ALA/19/LC response

381.2 John Attig responded to the ACOC preference for an instruction for all countries, eliminating as many exceptions as possible; John said ALA thought user convenience overrides worldwide consistency. John said the BL preferred to give a default and alternatives instead of making exceptions the rule although the BL realized much additional work would be required. There was general agreement that recommendations #1-4 were short-term solutions until the changes in Recommendation #6 could be proposed.

381.3 Recommendation #1: The JSC agreed to the revised wording “a country that was a constituent republic of the former U.S.S.R. or the former Yugoslavia” in 16.2.2.9. The JSC agreed not to remove Malaysia from that instruction until the National Library of Malaysia was consulted; Barbara Tillett will contact her contacts at that library. The JSC did not agree to the deletion of the examples “Guam” and “Puerto Rico” in 16.2.2.9.1.

**Action=Chair**

381.4 Recommendation #2: The JSC agreed to the revision, using the wording in LC’s response.

381.5 Recommendation #3: John Attig said that ALA didn’t want to limit the renumbered 16.2.2.11 just to islands as addressed by the Library of Congress/Program for Cooperative Cataloging Policy Statement. The JSC agreed with the suggested revisions in the LC response for 16.2.2.11 and 16.2.2.11.1 (no 16.2.2.11.2) with minor revisions; the JSC agreed with the addition of the Dakota Territory example in 16.2.2.9.1 but not with the addition of the explanation “Insular area of the United States” for the Guam and Puerto Rico examples in that instruction. The JSC did not accept LC’s proposal to add “Insular area” to the Glossary.

381.6 Recommendation #4: John Attig explained that the ALA proposal for the renumbered 16.2.2.12 had expanded the optional addition’s scope beyond the request to address a revision for places in China. Kate James said that the
optional addition represents a major difference from chapters 9-11 in constructing preferred names. Because it was important in EURIG to have the optional addition be the instruction, she suggested making the optional addition be an alternative instead; John, on behalf of ALA, agreed to that suggestion. The JSC agreed to change the optional addition to an alternative, to remove the Lhasa example in the alternative, and to remove the Malaysia examples for the base instruction until information has been received from the National Library of Malaysia.

381.7 Recommendation #5: The JSC agreed that ALA should submit a Fast Track entry to remove the abbreviation “V.I.” from B.11. The JSC expressed interest in receiving a proposal to delete abbreviations from place names from appendix B and to revise the relevant examples. Gary Strawn indicated that such a change would be a large clean-up project; Kate James noted that LCSH would also need to be updated. Bill Leonard said that Library and Archives Canada cannot do global edits but that he didn’t oppose such a future change.

381.8 Recommendation #6: The JSC agreed that the ALA offer of exploring handling larger place as a relationship rather than as part of the preferred name was worth exploring; ALA could collaborate with EURIG. Kate James asked if a discussion paper would be the first step and John Attig said that was likely.

381.9 The JSC agreed with LC’s addition of “preferred” in the renumbered 16.2.2.13 and 16.2.2.14 but wanted to add only the Dongcheng Qu example in 16.2.2.14.

Clean copy (the National Library of Malaysia responded that they agreed with the handling of Malaysian place names as shown in the ALA proposal; those changes and other minor changes to wording and examples happened via JSC email after the meeting; the new 2nd paragraph and alternative in 16.2.2.4 are from 6JSC/ALA/9; this text will be merged with the reworded chapter 11 before it appears in the 2013 RDA Update of the RDA Toolkit):

382 Places: 6JSC/ALA/9 (Initial Articles in Place Names (RDA 16.2.2.3))

382.1 Received and considered these documents:

- 6JSC/ALA/9
- 6JSC/ALA/9/ACOC response
- 6JSC/ALA/9/BL response
- 6JSC/ALA/9/CCC response
- 6JSC/ALA/9/CILIP response
- 6JSC/ALA/9/DNB response
- 6JSC/ALA/9/LC response

382.2 John Attig said that there was general agreement on the proposal except for ACOC. Kevin Marsh said that the suggested additional wording and example proposed by LC for the alternative in 16.2.2.4 allayed the ACOC concerns.

382.3 The JSC agreed with changes 1 (alternative in 16.2.2.4) and 2 (adding places in appendix C) in LC’s response. Alan Daskin said that the BL would do a Fast Track entry to add families to appendix C.

382.4 CILIP had proposed an additional paragraph in 16.2.3.4 to cover the case when the initial article has caused a mutation in the succeeding word. Kate James said the same situation applies in other areas. Gordon Dunsire said that CILIP would investigate the need for such an instruction and make a general proposal for all appropriate chapters. Later in the meeting the JSC returned to this proposal to confirm agreement with the ALA-proposed new instruction at 16.2.3.4.

382.5 Christine Frodl said that DNB would consider adding more examples via the Fast Track process.

382.6 The JSC agreed to the proposal with the two changes from LC’s response.

Clean copy (change to the paragraph on appendix B in 0.5 is from 6JSC/CCC/10; changes to 16.2.2.4 other than the new second paragraph and the alternative are from 6JSC/ALA/19; this text will be merged with the reworded chapters before they appear in the 2013 RDA Update of the RDA Toolkit):

384 Any other business: German description of serials

384.1 Christine Frodl explained that the German community bases its description of serials on the latest issue, not the first/earliest issue as RDA prescribes, including minor changes. This situation is crucial for implementation of RDA in Germany. Because of the major impact on the German networks and systems of changing to the first/earliest issue, a solution is needed that would allow description of serials based on the latest issue.

384.2 The JSC returned to this topic as part of Executive Session 3.
