

To: Joint Steering Committee for Development of RDA
From: Judy Kuhagen, JSC Secretary
Subject: RDA element sets, etc. – Other issues (from Actions arising from JSC November 2011 meeting to be discussed at the JSC November 2012 meeting – agenda topic #12)

JSC

- Discuss the purchase of a base domain to represent the ROF element sets and vocabularies in RDF – 299.1.4
- Discuss the creation of reciprocal properties for all base properties with appropriate range to provide interoperability between the hub ROF and the mapped vocabularies – 299.1.6
- Discuss whether to use local qualifications in the ROF mapping – 299.1.7
- Submit a proposal to the publishing community to set up a permanent governance for the ROF – 299.1.8
- Discuss revising the vocabularies categorization document 6JSC/ALA Rep/1 – 299.1.9
- Discuss the use of bounded and unbounded properties as part of the RDA namespace in the Registry – 299.2.5
- Discuss the decoupling of RDA entities and attributes from FRBR whilst the model undergoes consolidation – 299.2.9

JSC/ISBD RG

- Check that the mappings from ISBD Area 0 vocabularies to RDA content and carrier vocabularies are correct – 299.1.3
- Feed the issue of providing support for the mapping process back up the JSC and ISBD RG management chains - 299.2.7

Chair

- Check the status of the Dublin Core element mapping with Diane Hillmann and Gordon Dunsire in terms of whether it requires changes and whether it is publishable – 301.15
- Send JSC a list of the issues which need to be resolved before the element set on the Registry is published – 304.4

Secretary

- Send JSC a list of data about data issues based on previous JSC teleconferences for review – 291.4.2

ALA representative

- Check which issues still need to be resolved regarding vocabularies in the Registry – 304.3

ALA representative/CILIP representative

- Liaise on publishing the content, carrier and media type vocabularies in the Registry – 299.1.3

CILIP representative

- Invite representation from JSC, the ISBD Review Group and ISSN Network on the DCMI Bibliographic Metadata Task group – 284.3.2
- Check the options for a namespace to accommodate mappings from ISBD to RDA – 299.2.6
