Possible FRBR applications

Scenario A - Now

Scenario B

FRBR Benefits

- Collocation
 - ◆ Better organization to catalog
- Easier cataloging
- Reduction in cataloging load
 - ◆ Work only cataloged once for all expressions of it
 - ◆ Expression only cataloged once for all manifestations of it
 - ◆ Item cataloging (already simple) remains the same

FRBR Benefits

- Circulation: Place holds at “Work” or “Expression” level rather than only at manifestation level
 - (VTLS and OCLC demonstrate this)

Serial Example

Each of the five basic titles in the “family” of Atlantic Monthly is a “sub-work” under the Super Work.

The screenshot shows a window titled "View Bibliographic Record - Demo 95". At the top, there are navigation buttons for back, forward, and page 4 of 8. Below this is a tree view of the record structure:

New standard: why?

- Simplify rules
 - Encourage use as a content standard for metadata schema
 - Encourage international applicability
- Provide more consistency
- Address current problems
- Principle-based
 - To build cataloger's judgment
 - Encourage application of FRBR/FRAD

Why not just keep revising *AACR2*?

■ *AACR2*

■ 1978

■ 1988

■ 1998

■ 2002

Background

- 1997: International Conference on the Principles and Future Development of AACR, Toronto
 - Worldwide experts invited by the JSC
 - Reviewed principles
 - Content vs. carrier
 - Logical structure of the rules
 - Seriality
 - Internationalization

From *AACR3* to *RDA*

- ***April 2005*** – decided to start afresh by rethinking and restructuring AACR3
- Came as a result of concerns that a revision of AACR2 would not accommodate digital resources
- Adopted the name *Resource Description and Access*

New Cataloging Environment

- Wide range of information carriers: wider depth & complexity of content
- Metadata (bibliographic information) created by a wider range of personnel in and outside libraries; some using new metadata schemas (Dublin Core, etc.)
- Descriptive data in digital form (ONIX, etc.)

GOALS:

RDA will be ...

- A new standard for **resource description and access**
- Designed for the **digital** environment
 - Web-based product
 - paper also available
 - Description and access of all digital and analog resources
 - Resulting records usable in the digital environment (Internet, Web OPACs, etc.)

RDA will be ...

- “A multinational ***content standard*** providing bibliographic description and access for the variety of media and formats collected by libraries today”
- Developed for use in English language environment;
- it can also be used in other language communities

Content vs. display

- RDA will be a **content standard** --not a display or encoding standard
 - Independent of the encoding *communication format* (e.g., MARC 21, MODS)
 - Independent of *display format* (e.g., OPAC labels, ISBD)
 - International Standard Bibliographic Description (ISBD) display information in Appendix to RDA
 - *RDA*-created records can be displayed in an ISBD display if desired

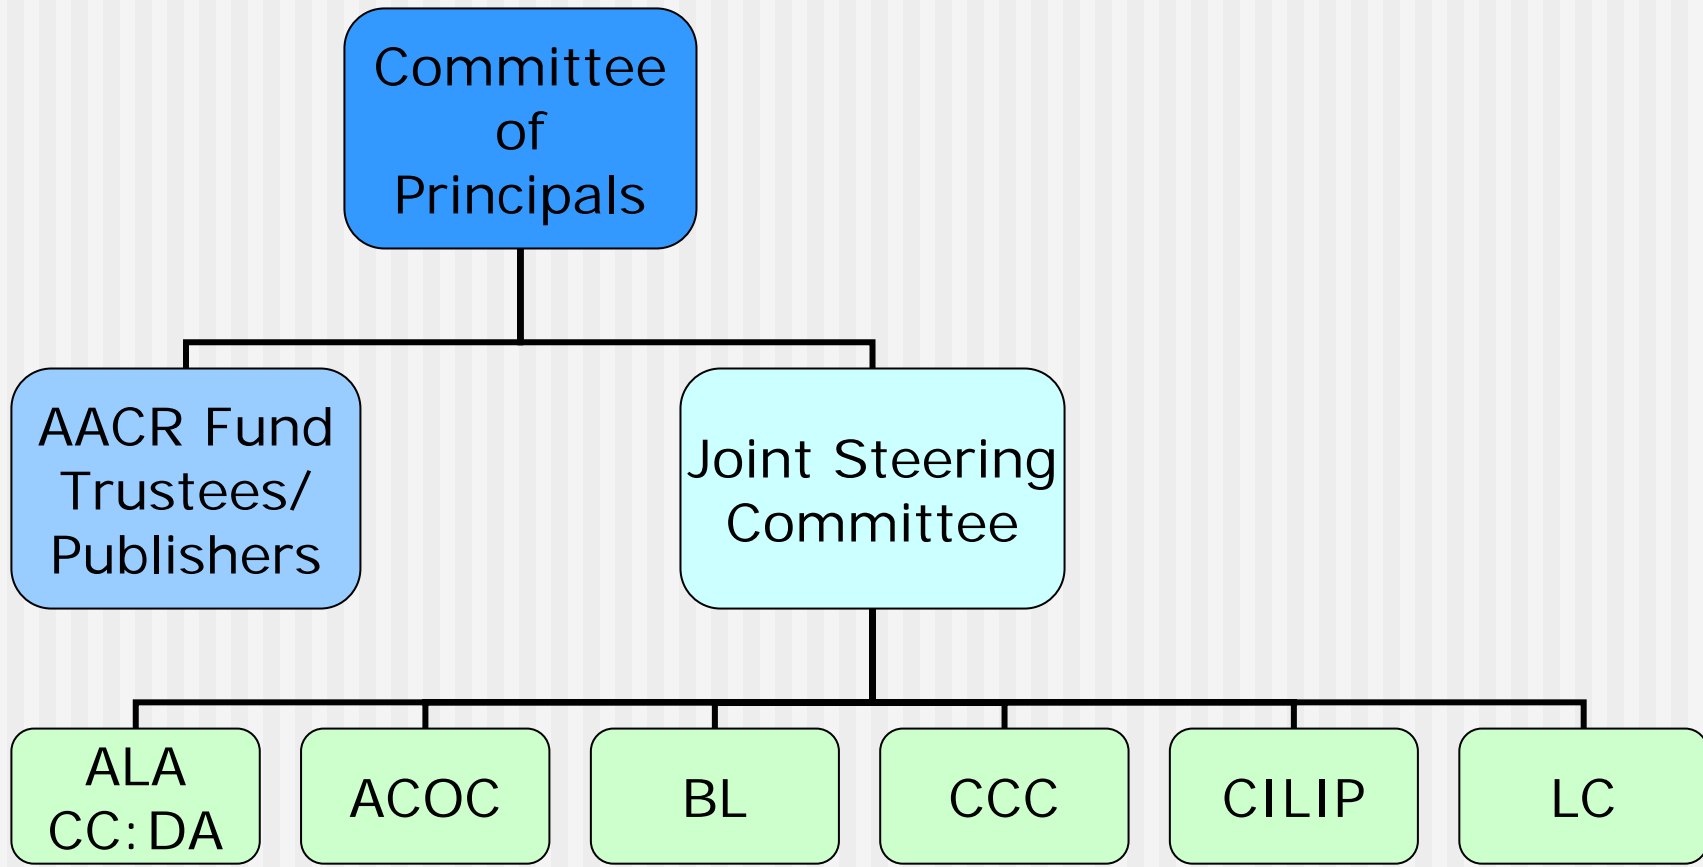

RDA will ...

- Support FRBR user tasks
 - Find, identify, select, obtain
- Enable users of library catalogs, etc., to find and use resources appropriate to their information needs

Who develops and supports *RDA*?

JSC and Project Management Team

Creating RDA

- Process of creating *RDA*
 - Editor drafts chapters
 - JSC reviews chapters
 - Editor revises chapters
 - JSC constituencies (and others) review chapters
 - JSC considers comments and requests changes to text by the Editor

RDA Proposed Structure

- General introduction
- Part A – Description and access
- Part B – Authority control (Access point control)
- Part C?
- Appendices
 - Capitalization, Abbreviations, Initial articles
 - Presentation (ISBD display, OPAC display, etc.)

0. Introduction
1. General guidelines for resource description
2. **FRBR "Identify"** the resource
3. Carrier description - **FRBR "Select"**
4. Content description - **FRBR "Select"**
5. Acquisition and access information - **FRBR "Obtain"**

New elements

- Media, Carrier, and Content Types to replace GMDs
- Other examples:
 - File characteristics for digital materials
 - Video format characteristics
 - Custodial information for archival resources
 - Braille characteristics

How many elements?

- Required mandatory data elements (instruction 1.4)
- Within the text, data elements will be labelled as:
 - "Required"
 - "Optional"

Transcription

- Importance of transcription of data to identify the resource varies
 - Rare books – very important!
 - Digital materials – maybe not as important

- “Take what you see”
 - Correction of inaccuracies elsewhere
 - Facilitating automated data capture

Customizing *RDA* *Web Tool*

- Instructions will be coded by type of content, mode of issuance, etc.:
- Can create a customized version of the Web-based *RDA* to see only the instructions you need or want to see
 - Cartographic instructions
 - Serial instructions
 - Etc.

Preparing for *RDA* ...

Questions and Answers

- FAQ (“Frequently Asked Questions”) on adopting RDA and other topics available on the JSC Web site:

<http://www.collectionscanada.ca/jsc/rda.html>

RDA Records in MARC Format

- Most RDA data elements can be incorporated into MARC 21
- A few changes in MARC 21:
 - New data elements to replace GMDs
 - Possibly some other modifications necessary
- RDA and Dublin Core: mappings, further discussions

Making decisions ...

- Required data elements + which others?
- Which alternatives and options?
- Who decides how to apply RDA?
 - National libraries
 - Other governing bodies: OCLC, the Program for Cooperative Cataloging
 - Individual institutions

Retrospective catalog maintenance?

- No: Intend for RDA records to be compatible
- Need for retrospective adjustments when integrating *RDA* and *AACR2* records will be minimal, if at all

Draft Reviews

- Mar.-June 2007: Chapter 3 “Carrier”

- Complete a brief survey – we want your feedback!

Training for *RDA*

- Catalogers *will* need some training in RDA – hope it's more like “orientation”
- Groups that provide training are beginning to make plans
- Online product will assist with learning

RDA Products

- Online (Web Tool) product first:
 - Different pricing structures

- Additional formats: co-publishers want information from you
