To: Joint Steering Committee for Development of RDA  
From: Alan Danskin, United Kingdom Representative  
Subject: Expand the scope of RDA 2.17.5, Note on Numbering of Serials, and 2.17.11, Note on Series Statement. UK Response

The British Library and CILIP thank ALA for the proposed revision. We agree in principle. Concern was expressed that the examples stray into meta/metadata. The note should relate to the Numbering of the Serial and not to sources of information. We believe that generalizing Sources of Information as noted in response to 6JSC/ALA/38 would be more appropriate means of recording notes such as, “Series statement from dust jacket”, or “Numbering of final issue from publisher’s website”.

Changes #1:- #5 Agree subject to comments on examples.
