To: Joint Steering Committee for Development of RDA

From: Alan Danskin, United Kingdom Representative

Subject: 2.15.1.4 Optional Addition. UK Response.

The decision to merge UK representation was taken after submission of the British Library’s proposals to the JSC Secretary. This response reflects the views of CILIP members of the CILIP/BL Committee as expressed through the committee’s wiki and at the meeting on 10th September.

General Comments

CILIP agreed with the proposal in principle, but suggested the improvements and corrections listed below.

Specific Comments

2.15.1.7

There is a conflict with 2.15.1.7 which should be addressed:

“How the resource has more than one identifier of the same type, record a brief qualification after the identifier.”

Example

1. Include a relationship in the example and move to Chapter 27.
2. Consider adding example of an audio book ISBN found on print item
3. Correction of e-ISSN to e-ISBN in clean copy

Optional addition

Record any identifier relating to a different manifestation of the same expression as an identifier for a related manifestation (see 27.1)

Add to first example block at 27.1.1.3 if considered necessary
