Subject: 2.7 Production statement: changing method of recording

ACOC thanks the British Library for this proposal to revise RDA 2.7 to change the method of recording production statements from “transcribe” to “record”.

ACOC agrees in principle to these changes, noting that they remove the ambiguity for some of the instructions, and offer the flexibility that is required for non-published material. However, ACOC’s view is that it would be preferable to defer these changes until after consideration of the broader re-organisation of RDA 2.7-2.10 proposed in 6JSC/BL rep/2.
